The Traditional Indian Vastu Shastra starts from Point No: 19

1) INTRODUCTION

Vastu Shastra – The Science of Architecture

Vastu, the architectural science of India is one of the 64 Vedic arts. All Vedic arts are highly developed and intricate. They require patience, deep contemplation, sharp intelligence and wisdom to perform properly. Vastu Shastra, which literally translated means ‘the Science of Buildings’. Like Ayurveda, Vastu is also developed for improving the existence of a man. *A desire to sleep peacefully in a house has made the sages and scholars of Ancient India to study for years in details about the earth and the components which influence the earth and human alike, has resulted in the formation of a science called Vastu Shastra.* The factors influencing a Site are topography, roads, surrounding structures, the Sun’s effects, Earth’s magnetic field, Earth’s energy fields, the cardinal directions and Nature’s elements. Vastu shastra lays down guidelines and tips for the ‘design of buildings’, so that Man can benefit from the useful and positive effects of these factors and is protected from the harmful and negative effects.

Ayadi Calculation

Ayadi calculation is one of the most important parts in Sthapatya Veda; Ayadi Calculation is also called as *Ayadi Shadvarga or the Building formulae*. The Scriptures as well as the ancient architects (Sthapatis) considered *the dwellings as a living organism*, irrespective of temple, residential homes, palaces etc.

The knowledge of Ayadi is used by the designer to determine the effects of the physical structure on the individual. The homeowner is born under the influence of a particular birth star. The building is considered to be a living being and also has a birth star. Ayadi calculations attempt to harmonize the energies created by the influence of the birth star of the person and that of the building. When these energies are harmonized the dweller experiences material prosperity and spiritual well being. Ayadi is also said to be able to affect the fate of the individual.

Like human beings, Vastu also has a horoscope. The Ayadi Shadvargas denote the horoscope of a Vaastu. It is the guiding formulae for the prosperity and well being of the inhabitants of the house. Here a master designer can change the horoscope of the artefact he designs, by giving due attention to the Ayadi Shadvarga formulae.

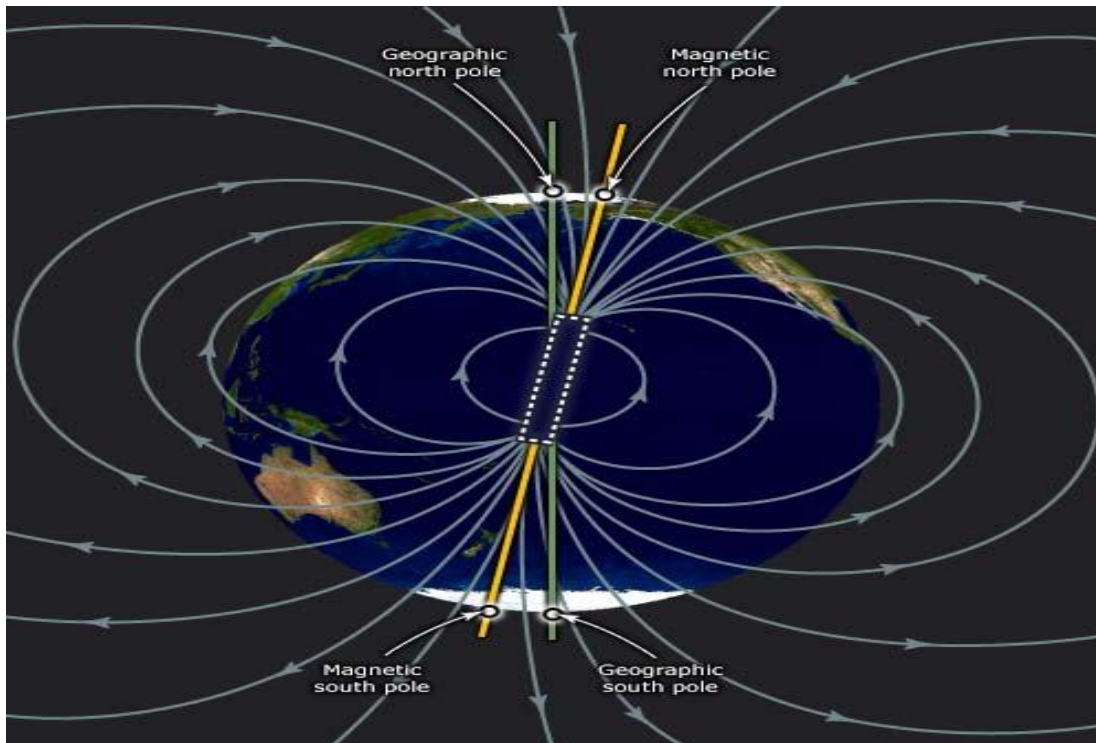

Traditional Indian Vastu and Western Vastu (Geopathology)

Geopathology is a science that deals with the study of pathologic (sickening, harmful) energies emitted from the earth that interfere with the healthy functioning of cell metabolism in our body.

Geopathic Stress mainly occurs from natural sources, but can be caused, as well, by man-made electro-magnetic devices and applications such as cell phones, computers, power lines, etc.

European Science has researched this topic for nearly a century and provides important insights about the significance on long-term and chronic health challenges.

Earth and It's Magnetic Field

The Earth's magnetic field is similar to that of a bar magnet with one pole near the geographic North pole and the other near the geographic South pole. *The Earth's magnetic field is mostly caused by convection of molten iron within the outer liquid core, along with a 'Coriolis Effect' caused by the overall planetary rotation, which organizes these "electric currents" in rolls aligned along the North-South polar axis.*

How does the Earth's Magnetic Field affect living things?

It is scientifically known that the Earth's magnetic field affects humans and animals in different ways because every cell within them not only reacts to electromagnetic currents but also produces them. For example the Earth's magnetic field could generate electric fields and currents around the heart and slightly impede the flow of blood.

Psychiatrists have noticed a correlation between increased geomagnetic activity and increased suicide rates and clinical depression. This has been explained by Kelly Posner, a Psychiatrist at Columbia University in the US: *"The most plausible explanation for the association between geomagnetic activity and depression and suicide is that geomagnetic storms can desynchronise circadian rhythms and melatonin production. The circadian regulatory system depends upon repeated environmental cues to synchronise internal clocks, and magnetic fields may be one of these environmental cues.*

Geomagnetic storms could disrupt body clocks, precipitating Seasonal Affective Disorder (SAD) and therefore increased suicide risk.

The Importance of Natural Sunlight in Our Home

Nothing is more important to us on Earth than the Sun. Without the Sun's heat and light, the Earth would be a lifeless ball of ice-coated rock. The Sun warms our seas, stirs our atmosphere, generates our weather patterns, and gives energy to the growing green plants that provide the food and oxygen for life on Earth.

Sunlight not only lifts the level of health for our house, but also it does the same for our body in the following ways:

- Sunlight has natural healing powers
- Bone health
- Anti-cancer
- Supports the immune system
- Protects against dementia and brain aging
- Good for losing excess fat
- Essential for decreasing symptoms of asthma
- Strengthens teeth
- Sunlight keeps our complexion clear
- Sunlight suppresses our appetite
- Sunlight improves our circulation
- Sunlight helps to balance our body's hormones
- Sunlight improves our mood
- Sunlight helps us to sleep very well

Importance of Home Lighting

Home lighting as an essential decorating element. Lighting is the most essential element in the decoration of home. We all need to bring more lighting into our homes. Lighting creates, paradoxically, both reality and illusion.

Lighting fixtures illuminate our treasured objects and highlights our favourite colours, as well as affects our mood, performance, and mental health on a daily basis.

Light Level - Illuminance

Light Level or Illuminance, is the total luminous flux incident on a surface, per unit area. The work plane is where the most important tasks in the room or space are performed.

Illuminance is measured in foot candles (ftcd, fc, fcd) (or lux in the metric SI system). A foot candle is actually one lumen of light density per square foot, one lux is one lumen per square meter.

- $1 \text{ lux} = 1 \text{ lumen} / \text{sq meter} = 0.0001$
- $\text{phot} = 0.0929 \text{ foot candle (ftcd, fcd)}$
- $1 \text{ phot} = 1 \text{ lumen} / \text{sq centimeter} = 10000 \text{ lumens} / \text{sq meter} = 10000 \text{ lux}$
- $1 \text{ foot candle (ftcd, fcd)} = 1 \text{ lumen} / \text{sq ft} = 10.752 \text{ lux}$

Sound Effect on Home Vastu

Varied variety of sounds produced by vibrations, have different effects on the beings and they act or react as per the sound produced.

Believe it or not, sound has major relation with our mood and as a pleasant music can cheer us up, the loud and screeching sounds can disturb it. *In fact, harsh sound causes noise pollution, which in turn, without our noticing, causes tension, stress, and other disorders like blood pressure, migraine and so on.*

Thus to restore the balance, harmony and peace within a family, the right kind of sounds should be prevalent in the house as per Vastu.

- The sweet and soft conversations between family members lighten the mood and spread a positive ambience.
- Avoid watching television during meal time rather prefer to have pleasant conversations or soft music.
- Sacred chants or healing rhythms of devotion should be played early morning in the house.
- Dripping faucets or leaky taps should be repaired as soon as possible.
- The hinges of the door should be kept well oiled, to avoid creaking sounds.
- Close the door gently so that the mind and body remains calm.
- The bell cast from an amalgam of five metals improve the positive energy flow in the environment, dissipating the negative vibrations.
- Wind chimes are also an important source of peaceful and serene environment.

- The soft melodious tunes can induce peace, relaxation and reduce sadness, tension and anger.
- Hanging wind chimes, changing harsh sounding door bells with pleasant-sounding ones and having rippling water fountains can be a means of adding the right sounds to any environment.

Sound Effect - Remedies

Windows and Walls

Cover windows with heavy draperies made from velvet, brocade, suede or jacquard fabrics. Thick draperies can help absorb the noise bouncing off walls in a larger room. Insulated thermal draperies are another noise-reducing option for windows. Hang large tapestries on your walls or cover your walls in fabric to help reduce the noise level.

Ceilings

Install fabric-covered false beams on soaring vaulted ceilings to provide quieting sound absorption. This is an ideal way to reduce the noise while enhancing your room with a designer-savvy flair. An optional noise-reducing idea is to adhere acoustical foam ceiling tiles directly over your existing ceiling.

These are lightweight, available in assorted varieties, and easy to install. You can also cover your ceiling, as well as your walls, with a sound-reduction paint.

Floors

Thick padding installed underneath dense carpeting can help reduce the noise in a large room. If you have wooden or tile floors, add a large area rug to muffle the sounds within your room. Situate a non-skid rug pad under your area rug to further reduce the noise level. Position an area rug on top of low-nap carpet to provide an additional layer of sound absorption. Carpets or rugs that are plusher and cushier absorb noise better than their thin counterparts

Furnishings

Upholstered furniture can help reduce the noise level in your room. Large sofas, chairs and ottomans covered in suede, corduroy, chenille, microfiber or other plush fabrics absorb sounds in a room to make it quieter.

Add a variety of textured toss pillows and furniture throws to maximize noise absorption. Free-standing room dividers or screens with textile panels can also help to reduce noise levels.

They are conveniently portable, allowing you to move them as needed.

2) SYSTEM REQUIREMENTS

Size

Vastu Soft.apk for Downloading – 12 MB

Vastu Soft size after Installation – 44.48 MB

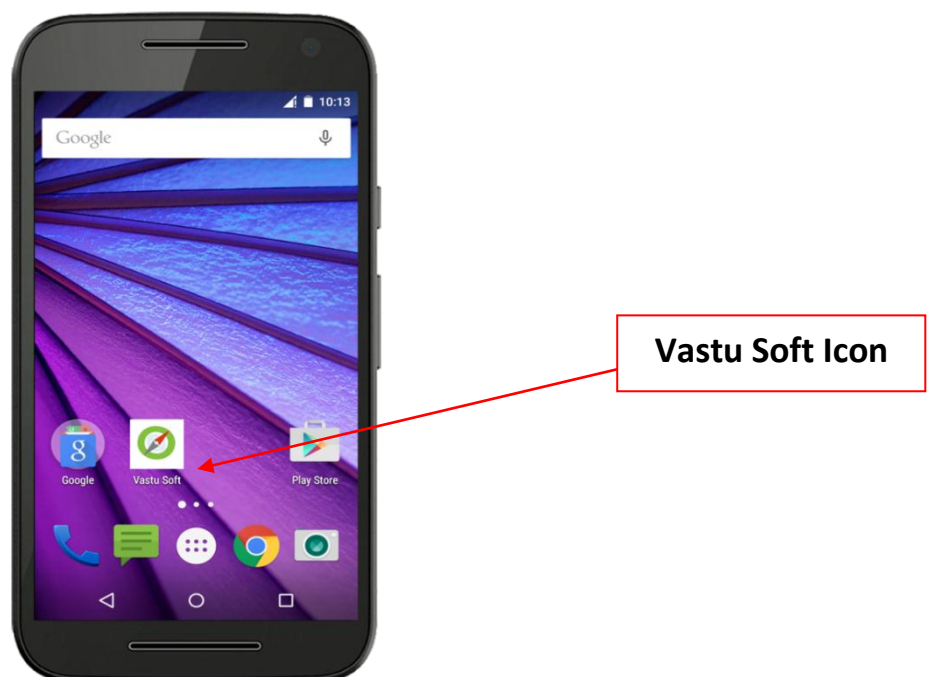

Sensors Used

- Gyroscope – Magnetic Compass
- Magnetometer – To detect the strength of Magnetic field
- Light Sensor – To detect the light strength or Illumination

Note: Sensors are not required for any Vastu calculation including Ayadi calculation.

How to find Vastu Soft after installation

After Successful Installation of Vastu Soft Application, Vastu Soft Icon will appear on our Smart Phone as shown below.

3) PURPOSE OF VASTU SOFT

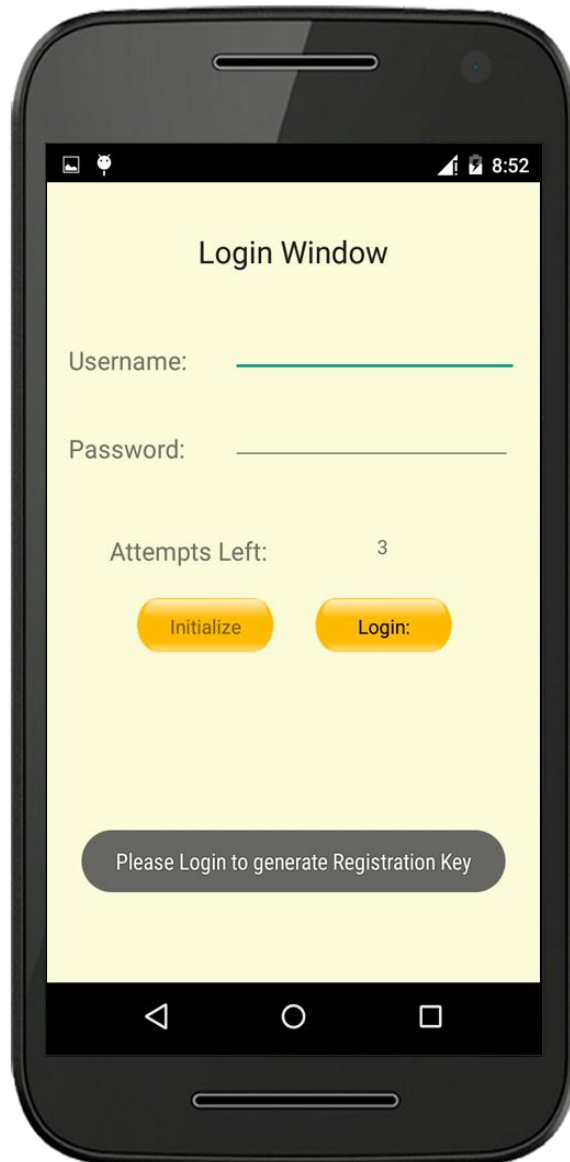

Purpose of Vastu Soft

*The purpose of developing Vastu Soft application is “to establish the link between Traditional Indian Vastu and Western Vastu (Geopathology) as they talk about the well being of Human being.”. We spread the importance of **Five Elements** and its relevance with Human body.*

4) LOGIN WINDOW

Registration

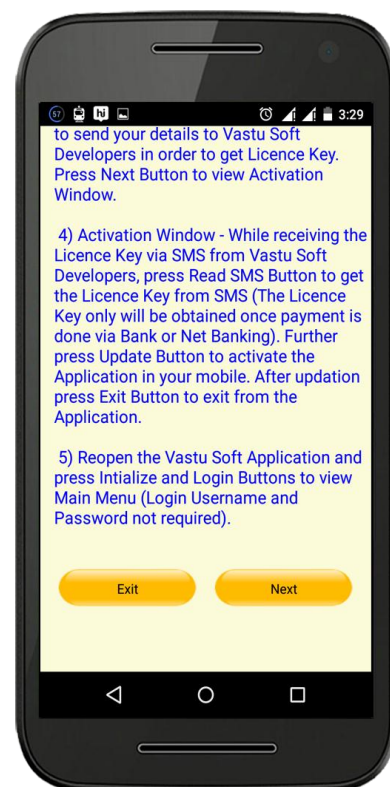

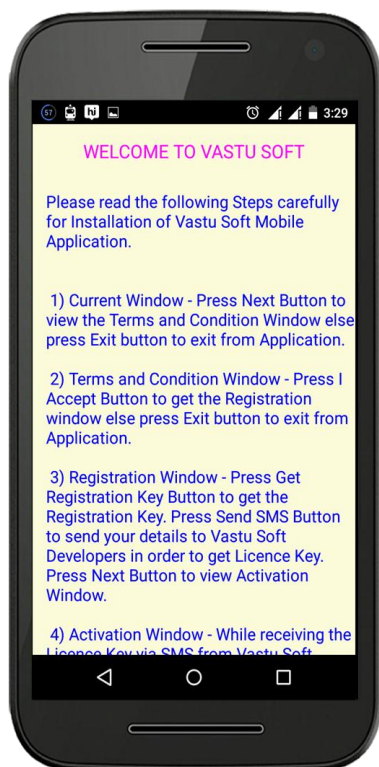

Press the **Initialize** Button to activate the username & password.

Enter the username & password as provided by Vastu Soft Developers.

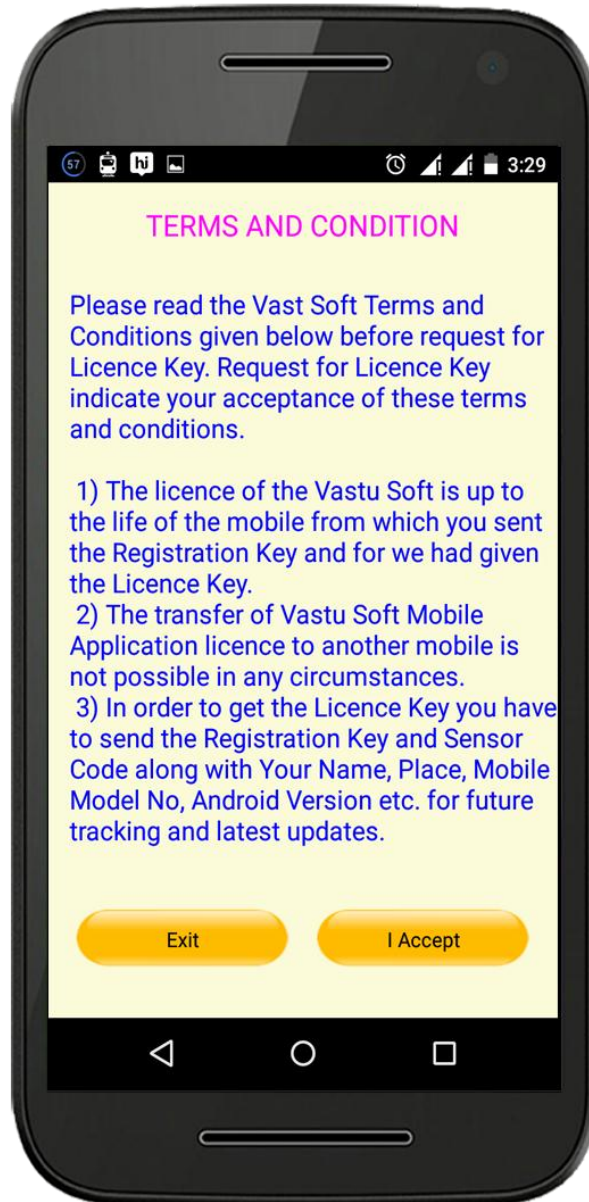

After entering the correct username & password the application will redirect to the Welcome Window for Installation Procedure.

5) INSTALLATION PROCEDURE

Press **Next** button to view the Terms and Condition Window else press **Exit** button to exit from Application.

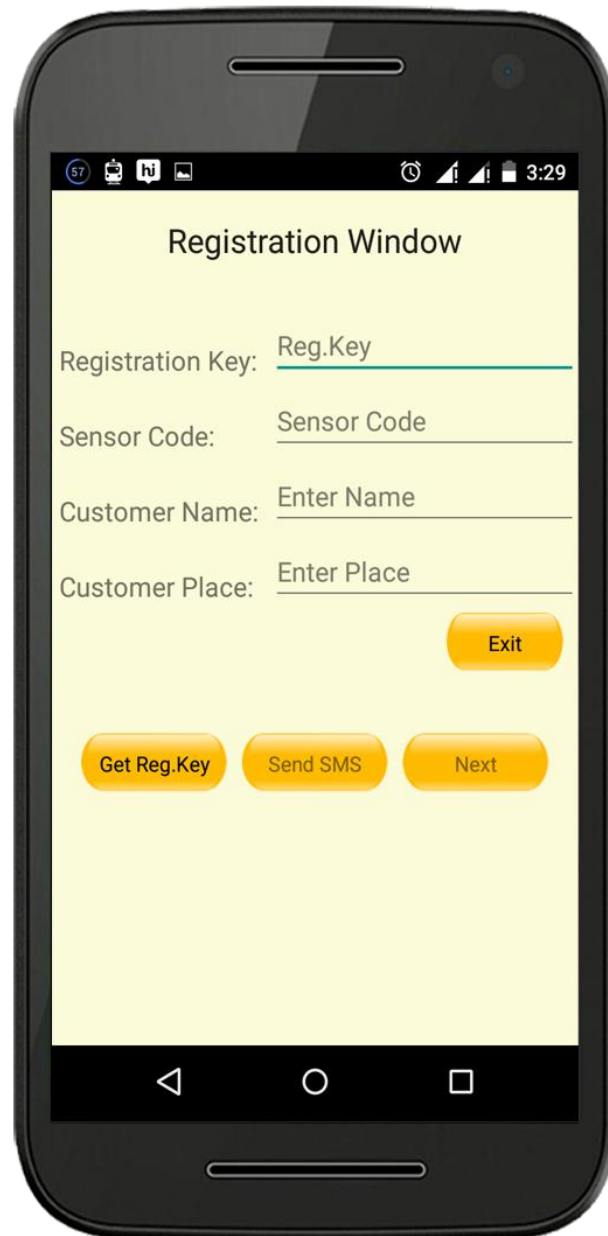

6) TERMS & CONDITION

Press **I Accept** button to get the Registration window else press **Exit** button to exit from Application.

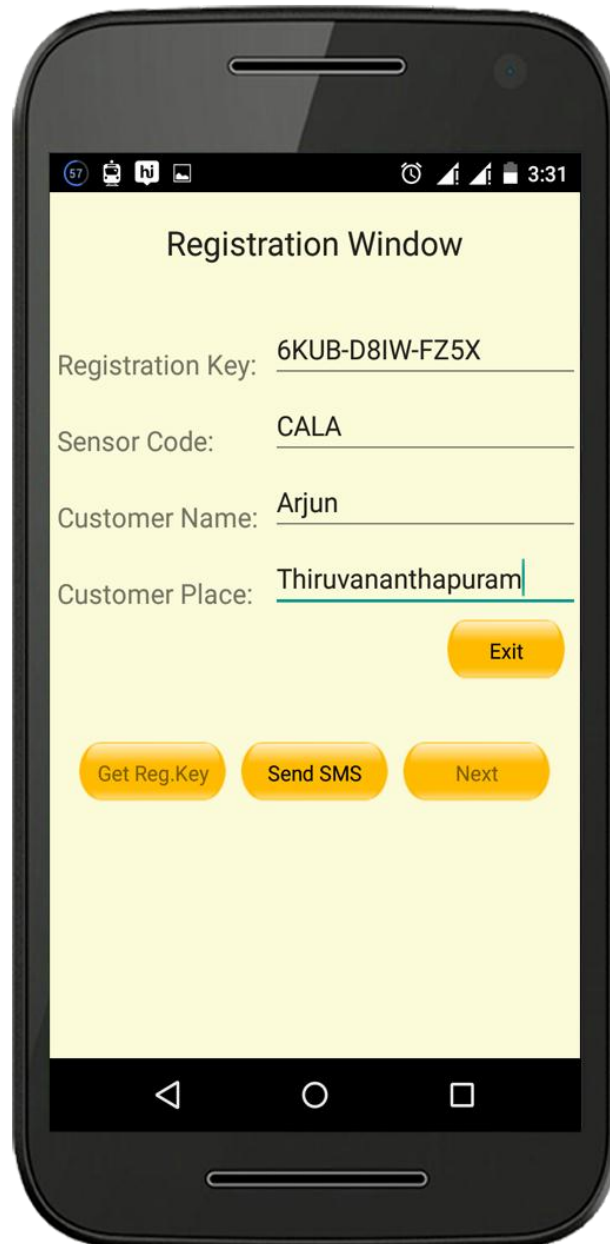

Registration Window

Step 1

Press **Get Reg.Key** button to generate the **Registration Key**. Enter your **Name** and **Location** in order to proceed with Registration.

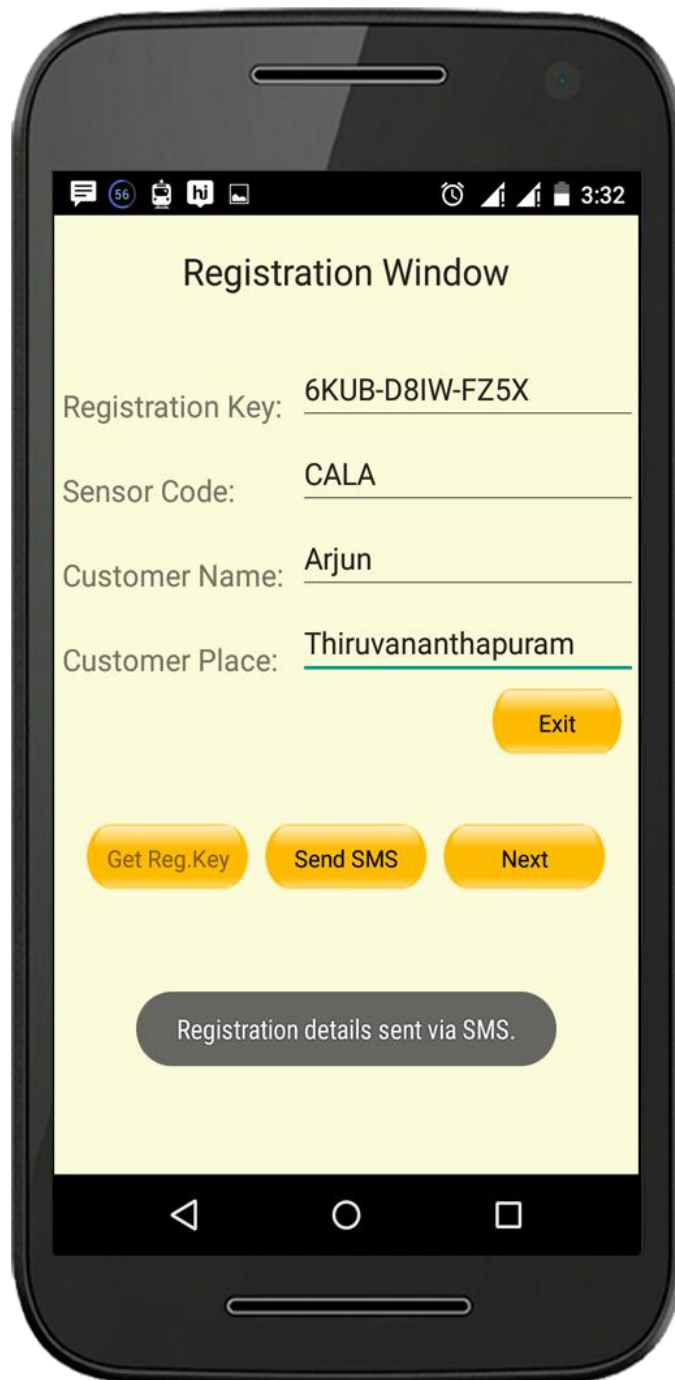

Step 2

Press **Send SMS** button to send your details to Vastu Soft Developers in order to get the **Licence Key**. You will receive a “**Message sent**”

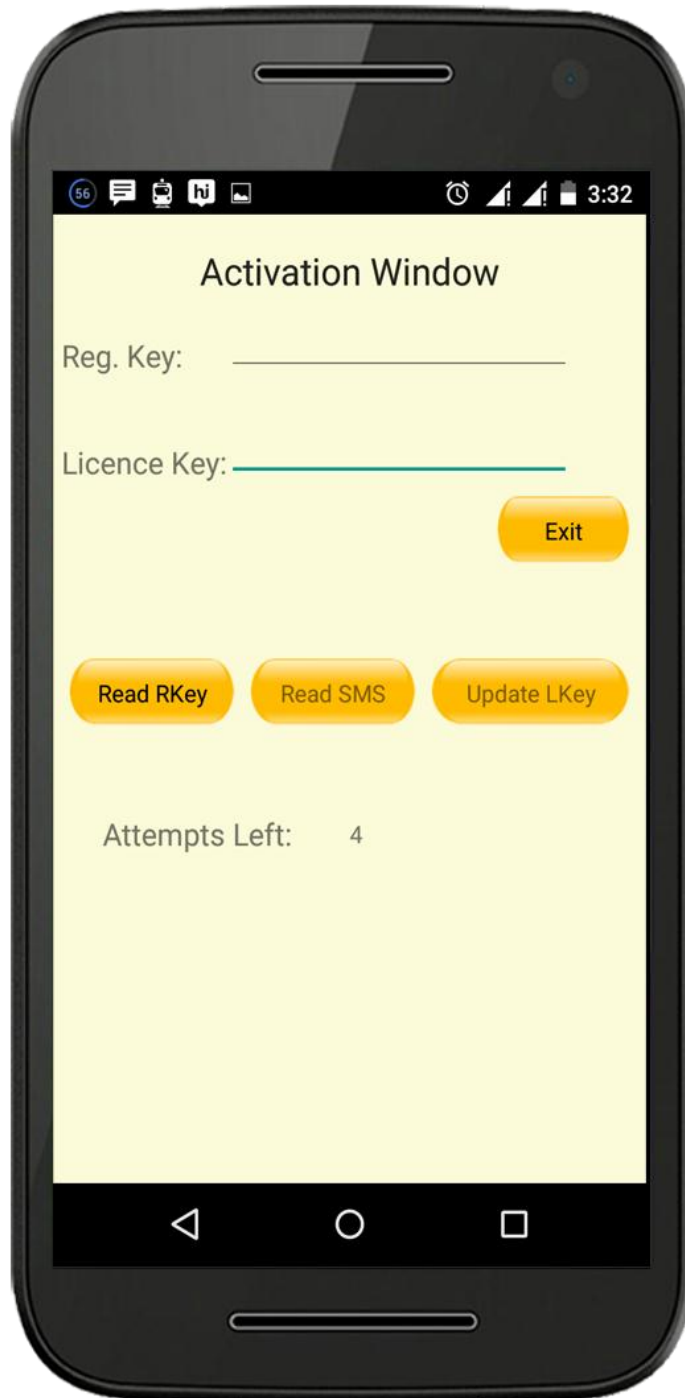

confirmation from Vastu Soft Application. Please ensure that you have enough amounts in your account to send a SMS.

Step 3

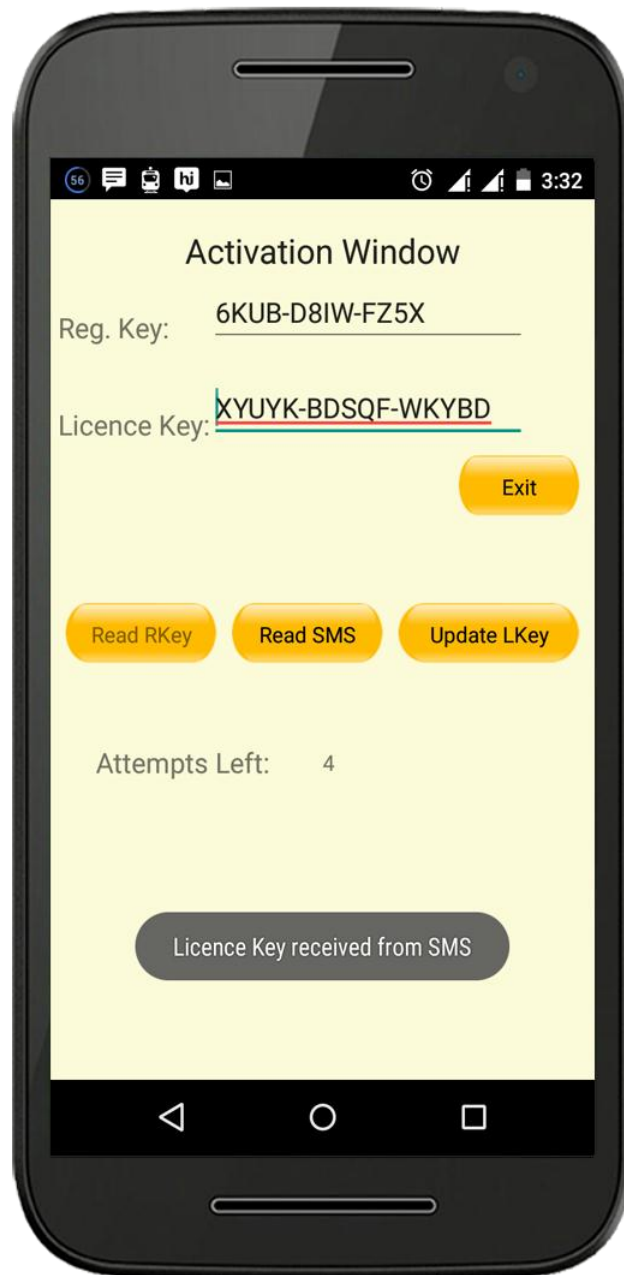

Press **Next** button to view Activation Window.

Activation Window

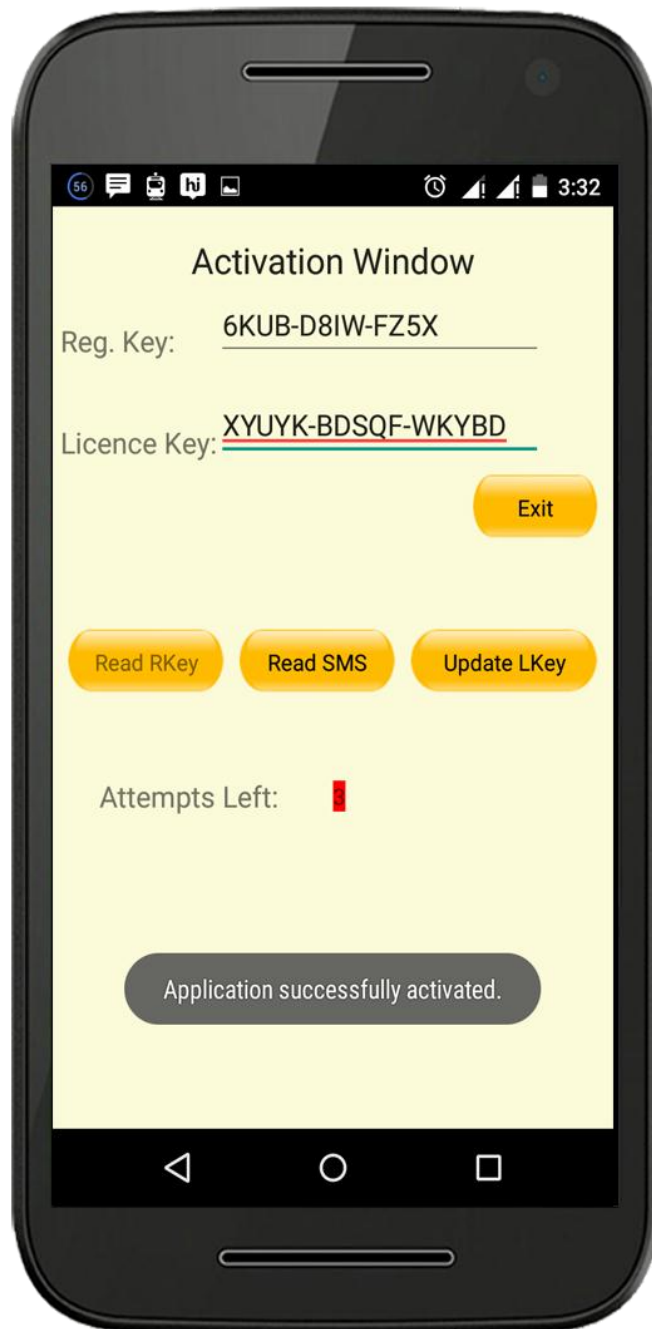

Press **Read RKey** to view and activate **Read SMS** button

After receiving the **Licence Key** via **SMS** from Vastu Soft Developers press **Read SMS** button to get **Licence Key** from SMS.

(The Licence Key only will be obtained once payment is done via Bank or Net Banking).

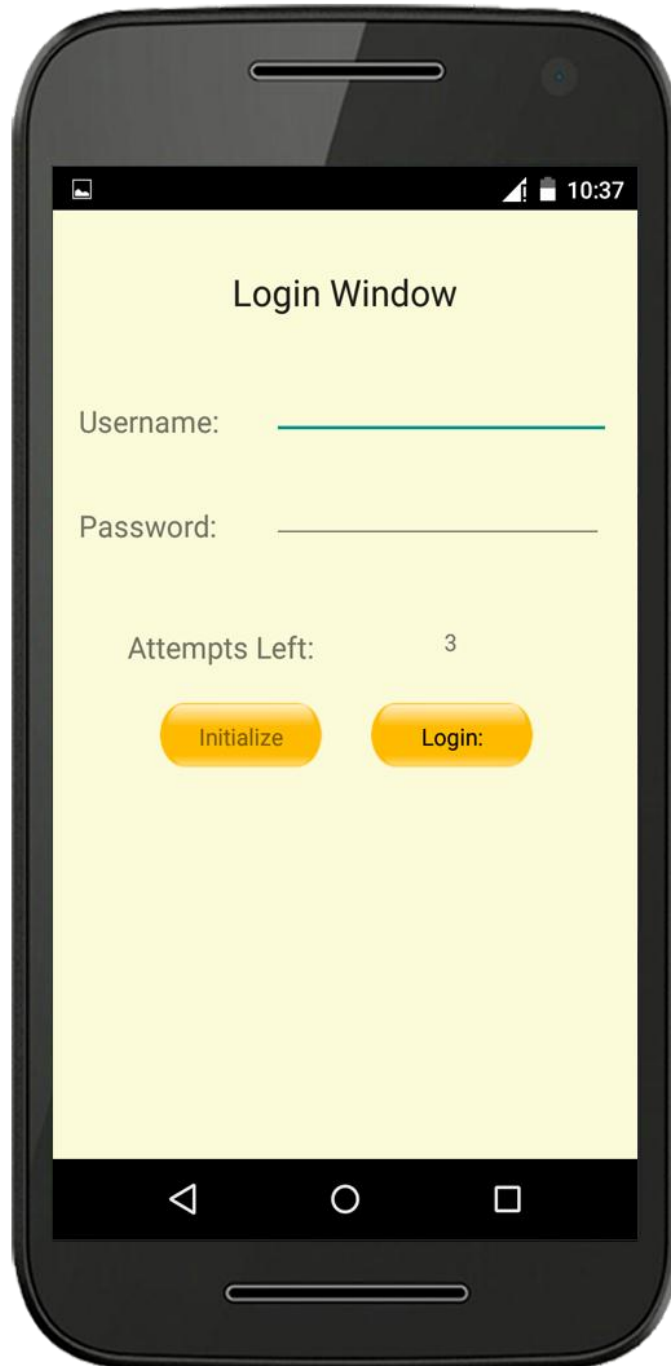

Further press **Update Button** to activate the Application in your mobile. A message “**Application successfully activated**” will appear on screen if the application is successfully activated to view the Main Menu.

After updation press **Exit Button** to exit from the Application

Login Window – Ready to Go

Press the **Initialize** Button & subsequently press the **Login** Button to view the Main Menu (Username & Password **not** required)

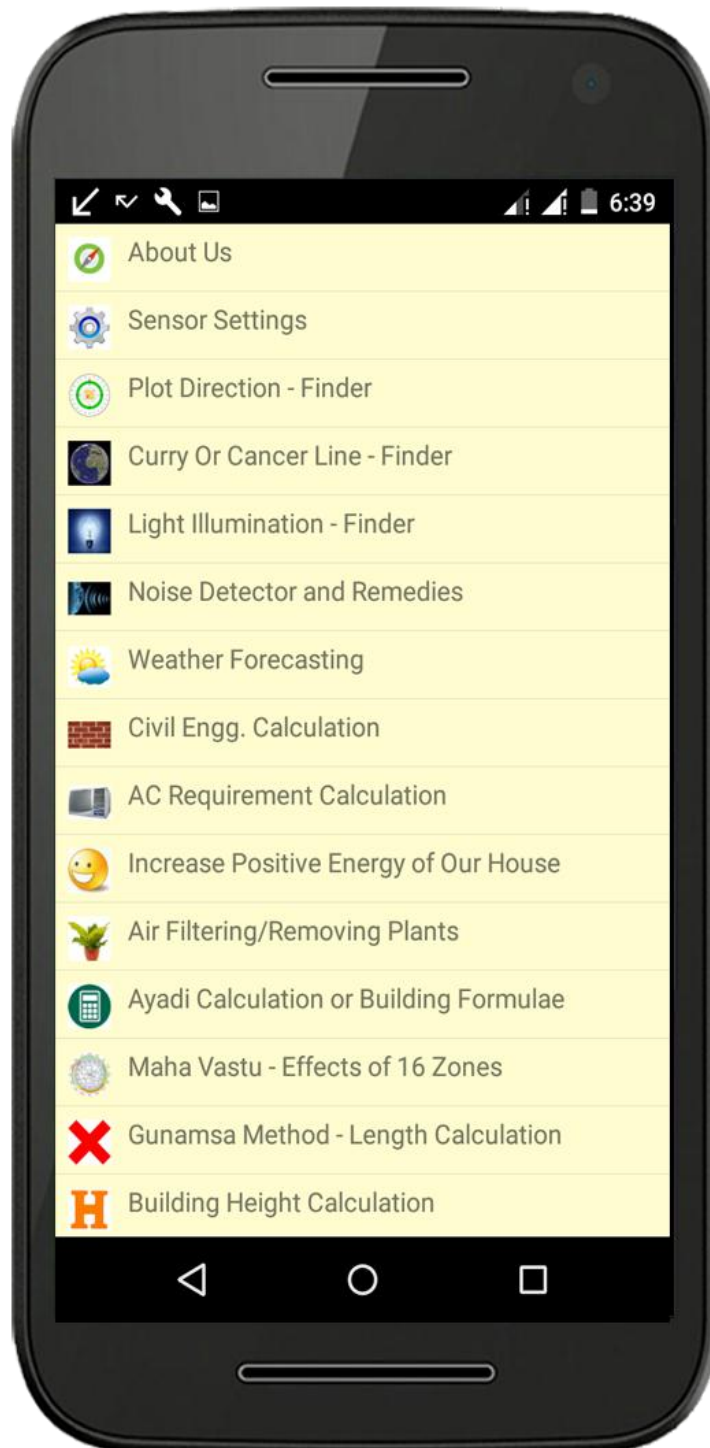

7) MAIN MENU

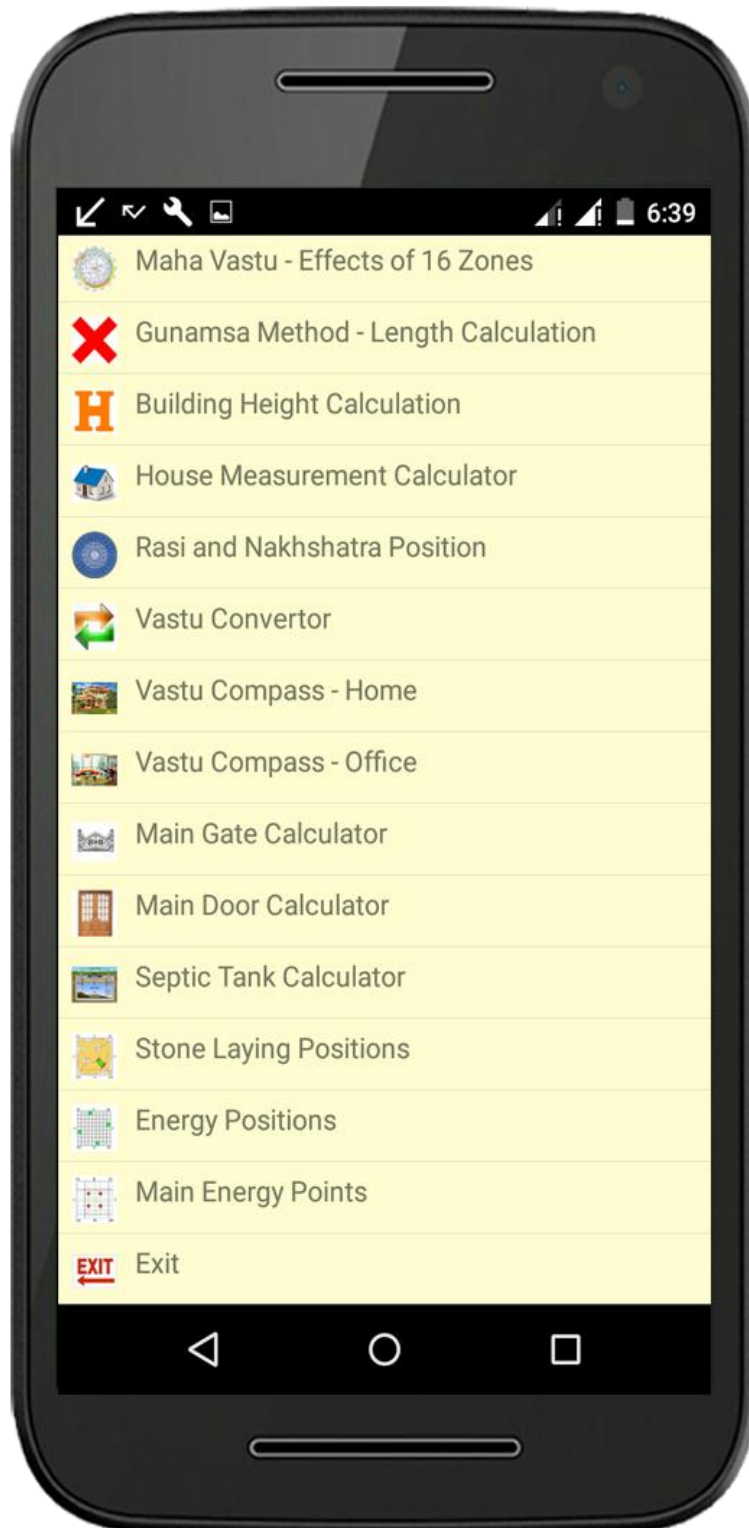

After entering the correct username & password system will show the Main Menu which will give the access to the following programmes.

- About Us
- Sensor Settings
- Plot Direction - Finder
- Curry or Cancer Line - Finder
- Light Illumination – Finder
- Noise Detector & Remedies
- Weather Forecasting
- Civil Engg. Calculation
- AC Requirement Calculation
- Increase Positive Energy of Our House
- Air Filtering/Removing Plants
- Ayadi Calculation or Building Formulae
- Maha Vastu – Effects of 16 Zones
- Gunamsa Method – Length & Breadth Calculation
- Building Height Calculation
- House Measurement Calculator
- Rasi and Nakshatra Position
- Vastu Convertor
- Vastu Compass - Home
- Vastu Compass - Office
- Main Gate Calculator
- Main Door Calculator
- Septic Tank Calculator
- Stone Laying Positions
- Energy Positions
- Main Energy Points

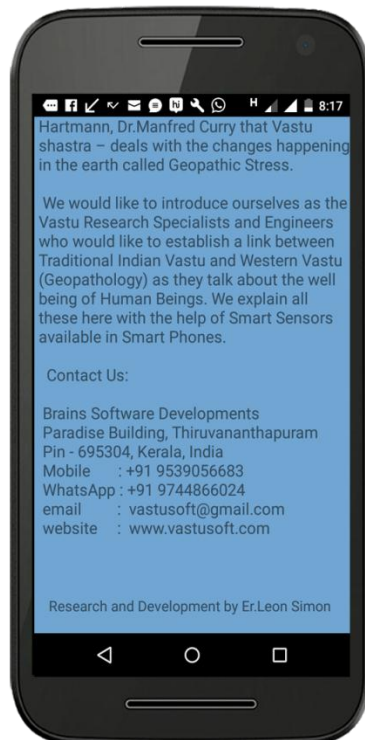

Screen View - 1

Screen View - 2

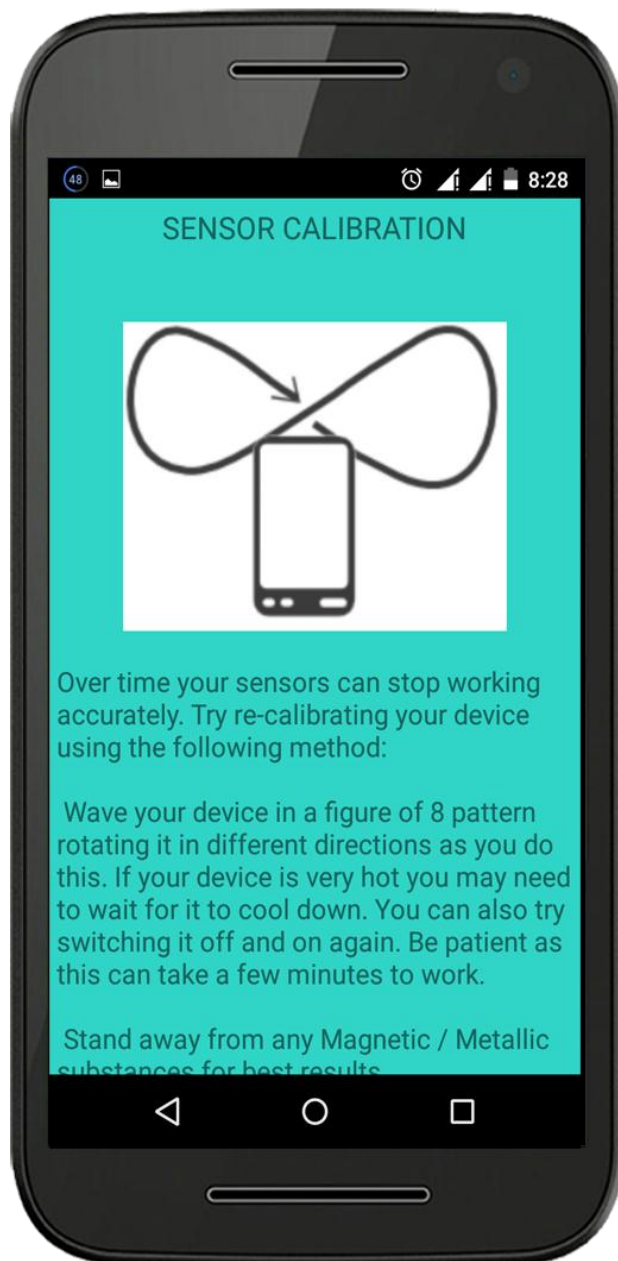

8) ABOUT US

9) SENSOR SETTINGS

Sensors are used to explain the Vastu in conjunction with Modern Science especially Magnetism, Light, Sound & Direction which have vital roles in Vastu. Magnetic Sensors are to be calibrated properly to get the best results.

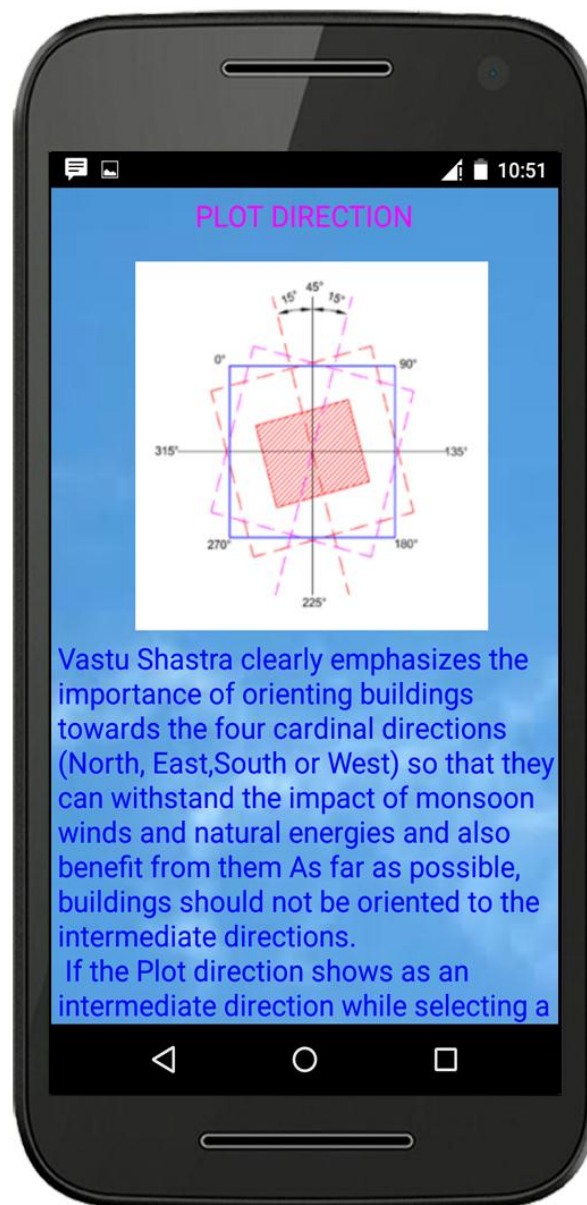

10) PLOT DIRECTION FINDER

Plot Direction Menu

Plot Direction – Description

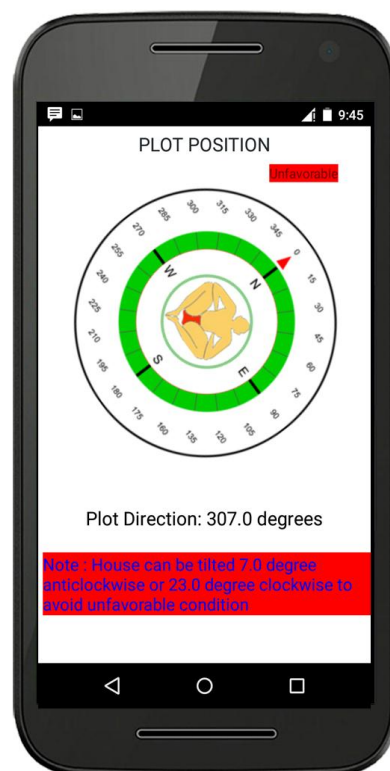

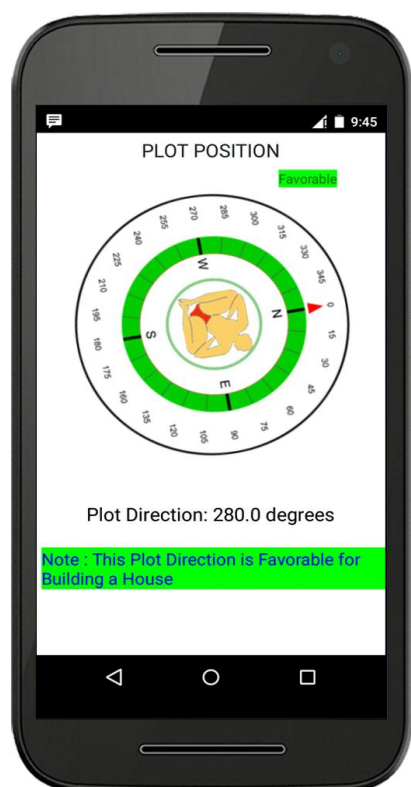

During the selection of the Plot, the intermediate directions are not advised to select in Vastu. The main reason is that if the plot direction is exactly intermediate then the total activity of the home will be directly proportional to the direction of that particular home i.e. sleeping, studying, sitting etc. Since the distributions of magnetic energies are more towards intermediate directions it may affect the entire health and wealth of the family. The scientific details are well explained in Vastu Soft Application.

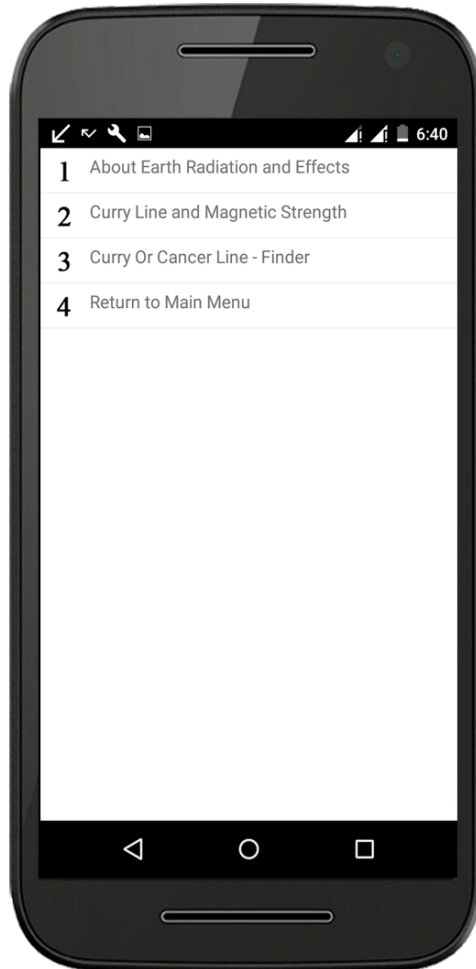

Plot Direction – Finder

Working with Vastu Soft Application

Place our mobile phone parallel to the earth surface and hold it same as a compass. Point our phone to desired direction where we want to know whether the pointed direction is favourable, medium or unfavourable. *If the colour turns green, the selected direction is good as per Vastu. If the colour turns yellow, the selected direction is medium as per Vastu. If colour of arrow turns red then the selected direction is not good as per Vastu.* Also the application will tell you to how much degree need to tilt in both Anti-clockwise and Clockwise direction to get the best results. **Stand away from any Magnetic / Metallic substances for best results.**

11) CURRY LINE OR CANCER LINE – FINDER

Geopathic Stress and Cancer - An introduction

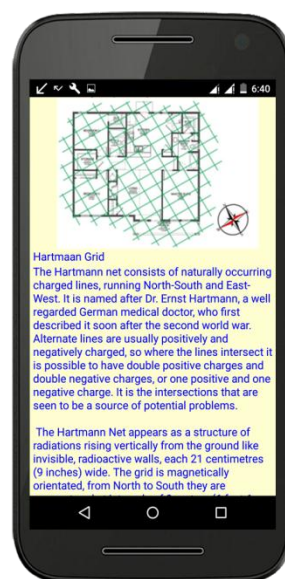

Dr Ernst Hartmann, MD, wrote that "Cancer is a disease of location triggered off by geopathic stress. We all produce cancerous cells on a regular basis, but they are continuously destroyed by our body's immune system. Geopathic stress does not cause cancer, but weakens our immune system."

Geopathic influences may indeed be among the most neglected contributing or causative agents for cancer and other disease. Contrary to what some may assume, geopathic stress is not a “question of belief”, but an area which has been studied in-depth over

millennia and today includes scientifically measurable and “respectable” quantities and factors such as electrosmog (electrical field, magnetic field, electromagnetic fields as those emanating from high-voltage power lines, electric cables, electrical appliances and synthetic materials) and high frequency pollution (mobile [cell] phone antenna, mobile [cell] phone radiation, DECT telephones, hotspot/WLAN, radar). The latter are also referred to as technopathic stress.

In recent times, there are a few well-known German (and Austrian) researchers in the field of “water veins” or earth radiation who collaborated with supervising physicians and others to carefully record and ascertain the correctness and stringency of observed correlations between disease - particularly cancer - and geopathic stress influences from earth radiation (such as Käthe Bachler[1]). An official confirmation and endorsement was published in 1985 by Dr. Veronika Carstens MD (wife of former German Federal President Karl Carstens): Dr. Carstens authored a study stating that there were 700 cases documented world-wide where terminal cancer patients had regained their health without any conventional treatment after their sleeping area had been moved from a geopathic stress zone. All of these cancer patients had been “given up” by their doctors.

Hartmann Net or Hartmann Lines

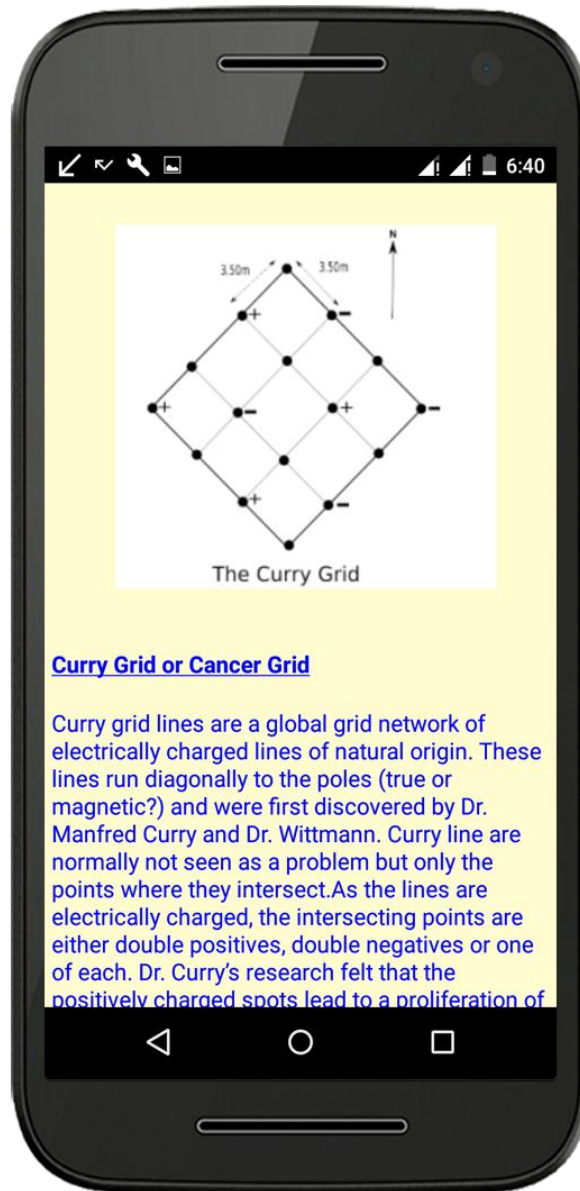

The Hartmann net consists of naturally occurring charged lines, running North-South and East-West. It is named after Dr. Ernst Hartmann, a well regarded German medical doctor, who first described it soon after the second world war. Alternate lines are usually positively and negatively charged, so where the lines intersect it is possible to have double positive charges and double negative charges, or one positive and one negative charge. It is the intersections that are seen to be a source of potential problems.

The Hartmann Net appears as a structure of radiations rising vertically from the ground like invisible, radioactive walls, each 21 centimetres (9 inches) wide. The grid is magnetically orientated, from North to South they are encountered at intervals of 2 meters (6 feet 6 inches), while from East to West they are 2.5 meters (8 feet) apart. Between these geometric lines lies a neutral zone, an unperturbed micro-climate. This network penetrates everywhere, whether over open ground or through dwellings.

The Hartmann net has been defined using the Chinese terms of Yin and Yang. The Yin (North-South lines) is a cold energy which acts slowly, corresponds to winter, is related to cramps, humidity and all forms of rheumatism. The Yang (East-West lines) is a hot, dry rapidly acting energy. It is related to fire and is linked to inflammations.

The points formed by the intersection of these lines, whether positive or negative, are dynamic environments sensitive to the rhythms of the hours and the seasons.

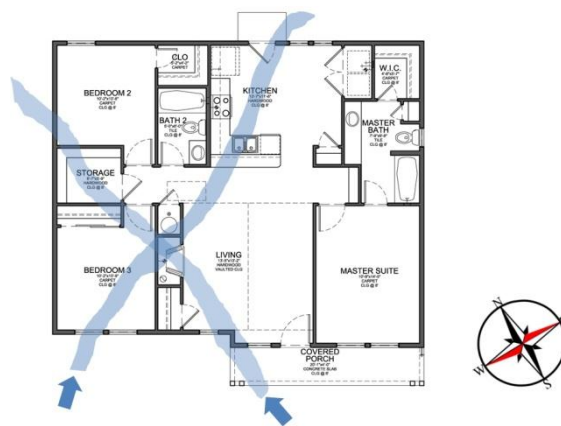

Curry Grid

Curry lines are a global grid network of electrically charged lines of natural origin. These lines run diagonally to the poles and were first discovered by Dr. Manfred Curry and Dr. Wittmann. There is some disagreement between authorities as to how wide apart these lines are, but the consensus seems to be approximately 3 meters, although most experts recognise that this can vary. The lines themselves are not seen

as a problem, only the points where they cross, and obviously lines which run in this way will have numerous intersecting points. As the lines are electrically charged, the intersecting points are either double positives, double negatives or one of each. From his studies Dr. Curry felt that the positively charged spots lead to a proliferation of cells, with the possibility of cancerous cell growth, whereas the negatively charged spots could lead to inflammation.

Water Veins

A water vein is water that flows underground between layers of rock, and can vary in size from mere trickles to large scale rivers. Water veins emit an energy that is draining our body's bio-energetic field and can be harmful if a person is spending long periods of time above those areas. It makes no difference how deep the water is down in the earth or how many floors a person lives above ground. Even on the 20th floor of an apartment building the effect can be clearly felt, sometimes even stronger due to the enhancement of iron in reinforced concrete in the ceilings.

GPZ – How to find (Naturally)

Dogs have always been an indicator of geopathogenic zones. The best place for the bed is where your dog lays down to sleep. The dog cannot sleep where it is irritated by infrasound resembling growling. The dog has a very well developed sense of hearing, it is controlled

by the vegetative nervous system and cannot only hear lower frequencies, but also accurately perceive subliminal stimulation.

A cat is the opposite of a dog. If a cat feels fine, it purrs. The vibration of the “valve” in the mouth cavity during breathing creates a tone similar to infrasound that makes the cat “vibrate”. The cat therefore seeks places that remind it of that sound. These include infrasonic pathogenic zones. Therefore, do not place your bed, resting place or workplace in areas where cats like resting.

Also bees tend to achieve higher honey yields in infrasonic pathogenic zones because infrasound does not let them rest and keeps them more active. This noise resembles them the sound produced by their wings at the time of their daily activity. Locating hives in suitable GPZs helps increase the quality of bee colonies.

Also ants are doing well in pathogenic zones because ants, same as bees, produce their own sound similar to infrasound. Locations of anthills are often identical with GPZs.

Effects of GPZs on Humans

Small children are very sensitive and therefore always seek such a place in bed to avoid GPZs, otherwise their sleep is restless. Therefore, the health condition of children is predetermined by the location of their bed.

This energy radiation comes from the earth interior. Long-term exposure to this radiation has harmful influence on humans. This mostly results in the development of a disease in the weakest organ of the human body. The whole process may be accelerated by congenital predisposition. A short-term stay in these zones causes concentration disorders or feelings of unease and unexplained fatigue in more sensitive individuals. A long-term stay, e.g. sleep, may start a variety of diseases, from the most banal to the most severe ones. These are mostly conditioned by an accumulation of other factors. In the opinion of a number of scientists dealing with natural treatment, active health precautions also involve respecting geopathogenic zones.

In official technical literature, we can read that geopathogenic zones cause not only headaches and insomnia, but also severe diseases. Staying in the zone for longer periods of time causes cancer, liver diseases, lower urinary tract diseases, infertility, chronic rhinitis and a number of other diseases. A normal person will feel the malignant influence of the zones only when he/she gets sick.

The long-term effects of radiation on humans in occupied areas may, for example, affect the frequency of failures when generating the helix of the ribonucleic acid, the genetic information carrier. In a better case, such failure is detrimental to the activity and function of the affected cell; in a worse case, it affects its division and then the offspring of a single cell can put us at risk of cancer. This process of gradual accumulation of errors can take many years.

Geopathogenic Zones

Dr. Juryška, an Olomouc-based oncologist, expressed suspicion that the high incidence of neoplasm diseases in Olomouc is related to the number of occurrences of geopathogenic zones, which was the impetus for his detailed research.

The result of his research is the following GPZ harmfulness scale

The geopathogenic zone harmfulness scale

1. Weak, at the limit of recognizability, the organism easily eliminates the effects.
2. Well recognizable, a healthy organism can eliminate the effects in a long term; however, a sick person gets clearly weaker and the healing process is prolonged.
3. It weakens the nervous system, there is slight nervousness, a healthy organism is able to eliminate the effects for some time; however, a sick organism shows problems that are not improving.
4. Strong nervousness, insomnia, organ dysfunction, seemingly incurable chronic pain and diseases which, however, improve quickly when staying out of the zone. A healthy organism can resist for a short time, a sick organism cannot.

5. The emergence of benign malformations, restlessness accompanying the person outside the zone, organ dysfunction which is not improving when staying out of the zone and necessitates treatment, the same is true of pain, the nervous condition is similar to stress.
6. The emergence of strong degenerative changes and pre-cancers, depression, pain of unknown origin unresponsive to therapy, escalated difficulties of the previous degree.
7. Over the years, the emergence of mutations and cancer-causing changes, there may or may not be a nervous reaction (this is the threshold area of neural reactivity)
8. Within a few years, the emergence of malignant growth but no longer any nervous reactions, and therefore one feels a little better in this zone than in the previous one (it is insidious), organ disorders are not as noticeable (nevertheless, they are severe), the nervous system is usually not able to pass pain, and if it does, then to a minimal extent, normal sleep, but in fact missing, it is rather apparent apathy, mild poisoning by poorly eliminated metabolic products, warning signs of yellowish pale skin, but the patient does not feel seriously ill.
9. Malignant growth occurs within a few months unless death occurs sooner due to organ failure, disorders rapidly increase, resulting in exhaustion of hormonal nature, apathy - neither the person nor the organism resist, regeneration is virtually absent, emergence of atrophy and poisoning by metabolic waste products.
10. Almost immediate failure of organs and their functions, which are the cause of death (not cancer), growth arrest, quick emergence of dull headache, apathy no longer has time to develop because there is instinctive anxiety and fear of the place (even hallucinations) and one is unable to stay here long.
11. Loss of the sense of balance (risk of injury), loss of consciousness in a few hours, severe shock condition usually causes death within a few days, the condition of the organism is only rarely improved by intensive therapy.

12. Mortally dangerous places, death occurs within a few hours at the latest, according to the origin of pathogenic radiation.

Strong radiation of degrees No. 11 and 12 does not occur under normal circumstances.

CURRY LINE & MAGNETIC FIELD STRENGTH

Presence of Magnetic Fields and Its Impact on Human Beings

The Earth's magnetic field is similar to that of a bar magnet with one pole near the geographic North pole and the other near the geographic South pole. The Earth's magnetic field is mostly caused by convection of molten iron within the outer liquid core, along with a 'Coriolis Effect' caused by the overall planetary rotation, which organizes these "electric currents" in rolls aligned along the North-South polar axis. The studies done by Many Scientist & Psychiatrists that the presence of High Magnetic Field can cause many health problems including suicidal attempts. The Geopathic Stress and Zone of Disturbance are the main contributors for creating High Magnetic field over an area. The following are the main symptoms that can arise through the presence of Geopathic Stress and Zone of Disturbance.

- Refusal to go to bed. Opposition against going to bed.
- Insomnia. Unable to fall asleep for hours.

- Nightmares. Feelings of a “presence” in the bed.
- An aversion to certain spots in the bed.
- A feeling of “falling out” of bed.
- Sleepwalking.
- Night sweats. Also feeling cold or shivering in bed.
- Waking up tired most mornings. Fatigue and apathy.
- Nausea in the morning, even vomiting.
- Despondency, stress, depression.
- Frequent crying upon waking up in the morning.
- Rapid heart-beat while lying still in bed. Cramps.

Curry Line / Magnetic Field Strength – Finder

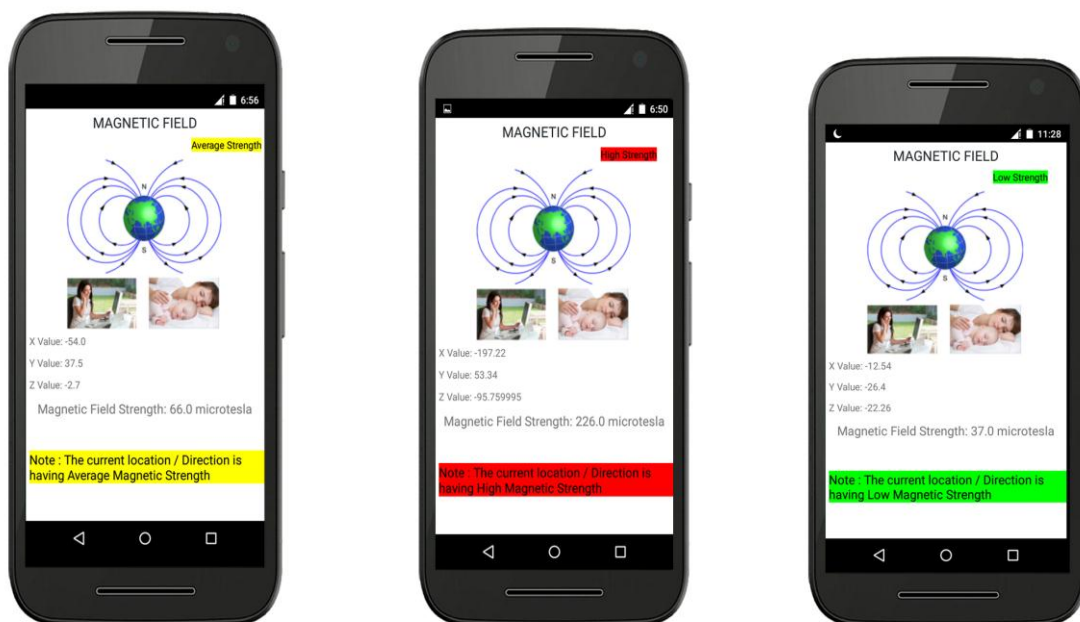

In Vastu Soft, we use the Technology of Magnetometer to find out the presence of High Magnetic field around an area to avoid health related problems in future.

*The Magnetometer sensor in our Tablet or Smartphone also utilizes the modern solid state technology to create a miniature Hall-effect sensor that detects the Earth's magnetic field along three perpendicular axes X, Y and Z. The Hall-effect sensor produces voltage which is proportional to the strength and polarity of the magnetic field along the axis each sensor is directed. The magnetometer readings are reported in micro Tesla units (μT). The average Magnetic Field Strength of Earth is **50 μT** and above **100 μT** is considered as High Magnetic Field Strength of that particular area.*

Working with Vastu Soft Application

Place our mobile phone parallel to the earth surface and point our phone to desired direction where we want to check whether the present location having the presence of **High Magnetic Field**. If the colour turns green, the presence of Magnetic Field is **Low** (Range: 50 μ T and below). If the colour turns yellow, the presence of Magnetic Field is **Average** (Range: 75-100 μ T). If the colour turns Red, the presence of Magnetic Field is **High** (Range: Above 100 μ T). **Stand away from any Magnetic / Metallic substances for best results.**

Always try to avoid the area having High Magnetic field while selection of a room especially for Children's Study, Bed Room, Office Room, and Prayer Room etc.

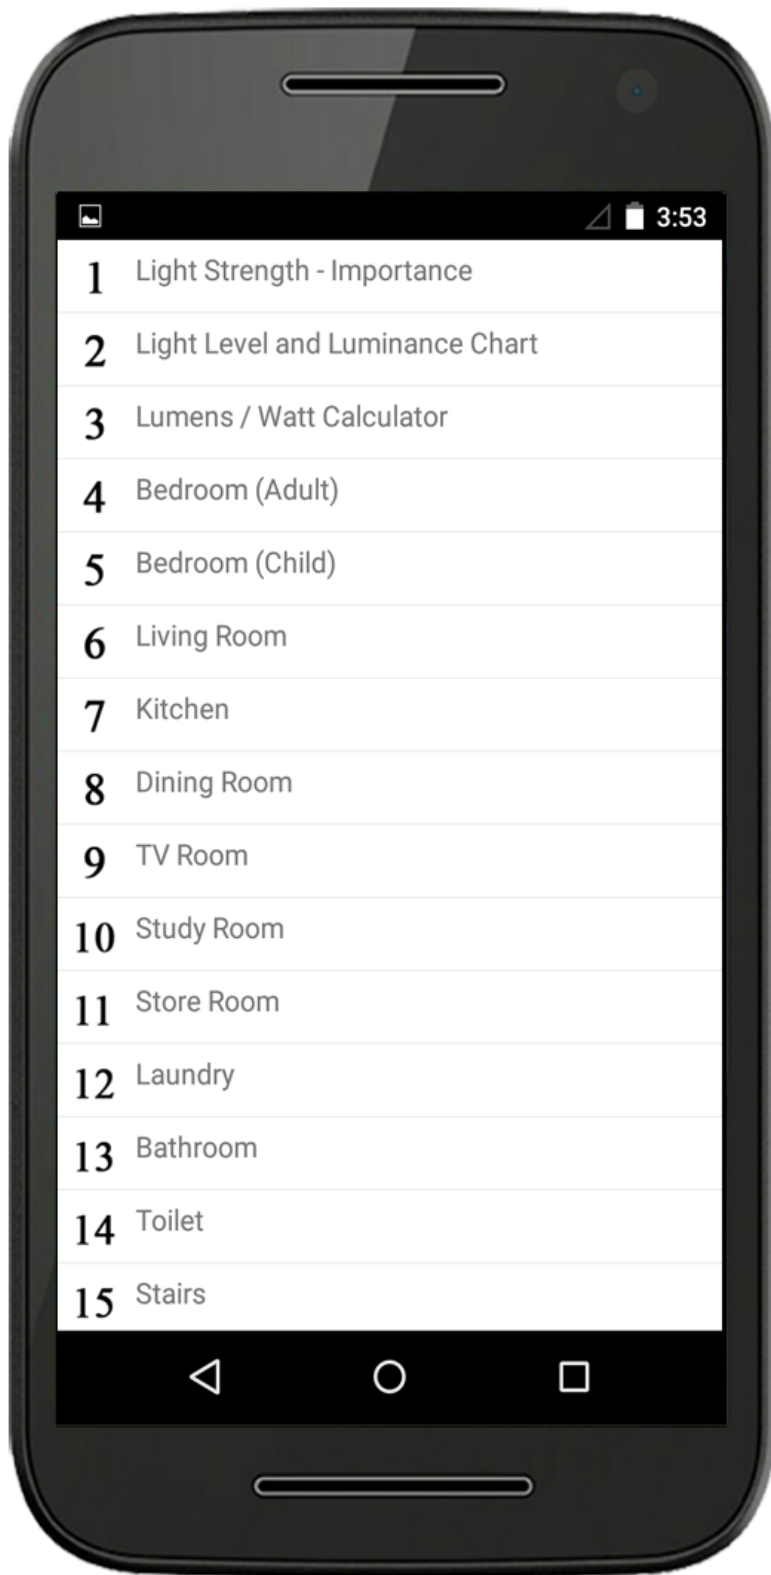

12) LIGHT ILLUMINATION – FINDER

Light Illumination Finder - Menu

Vastu Illumination Finder menu helps to view and access the Light Strength details of a home/office.

This menu helps to access the following programmes.

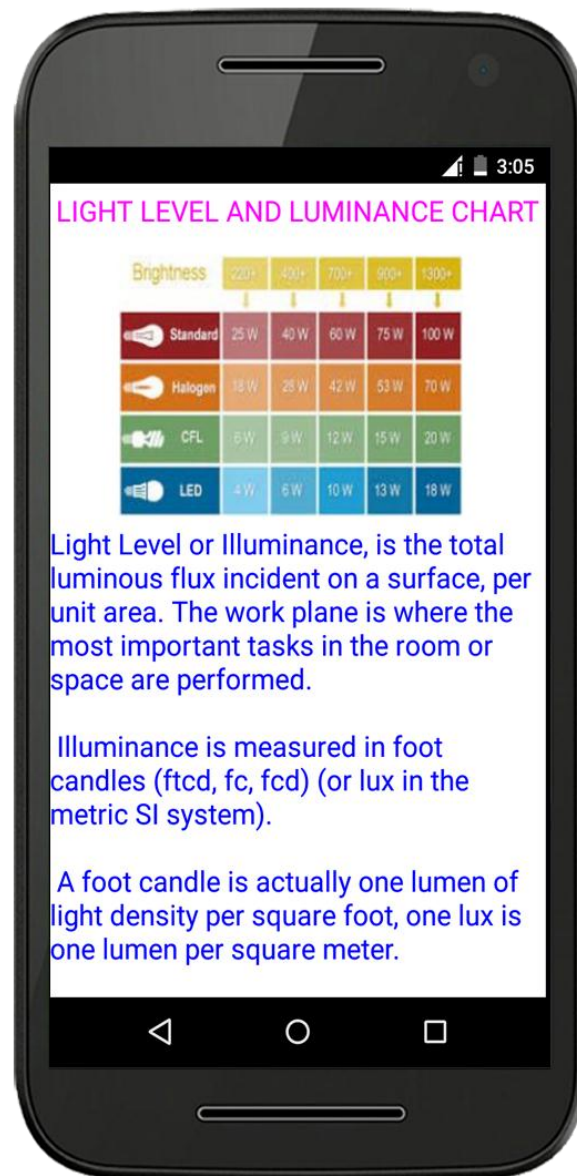

- Light Strength - Importance
- Light Level and Luminance Chart
- Bedroom (Adult)
- Bedroom (Child)
- Living Room
- Kitchen
- Dining Room
- TV Room
- Study Room
- Store Room
- Laundry
- Bathroom
- Toilet
- Stairs
- Corridor
- Hall
- Reception
- Office Room
- Class Room

Light Strength Importance

Light Level and Luminance Chart

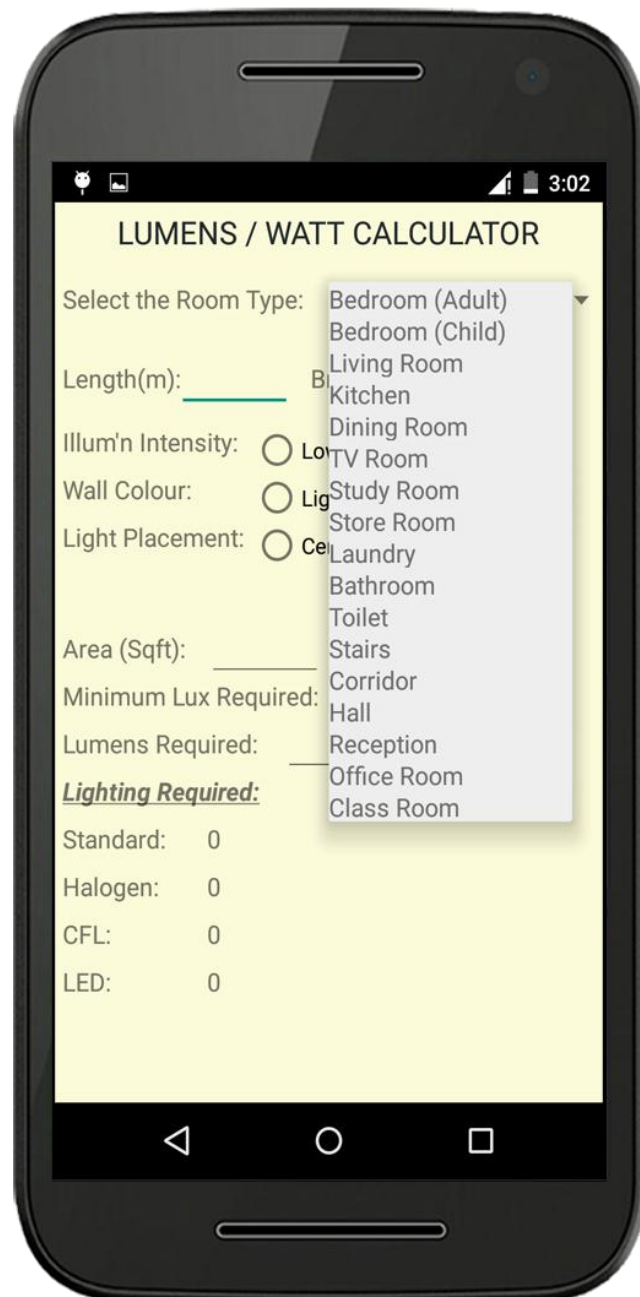

Vastu Soft Application will help us to know the Light Level of each room as available in application. Two examples are given below.

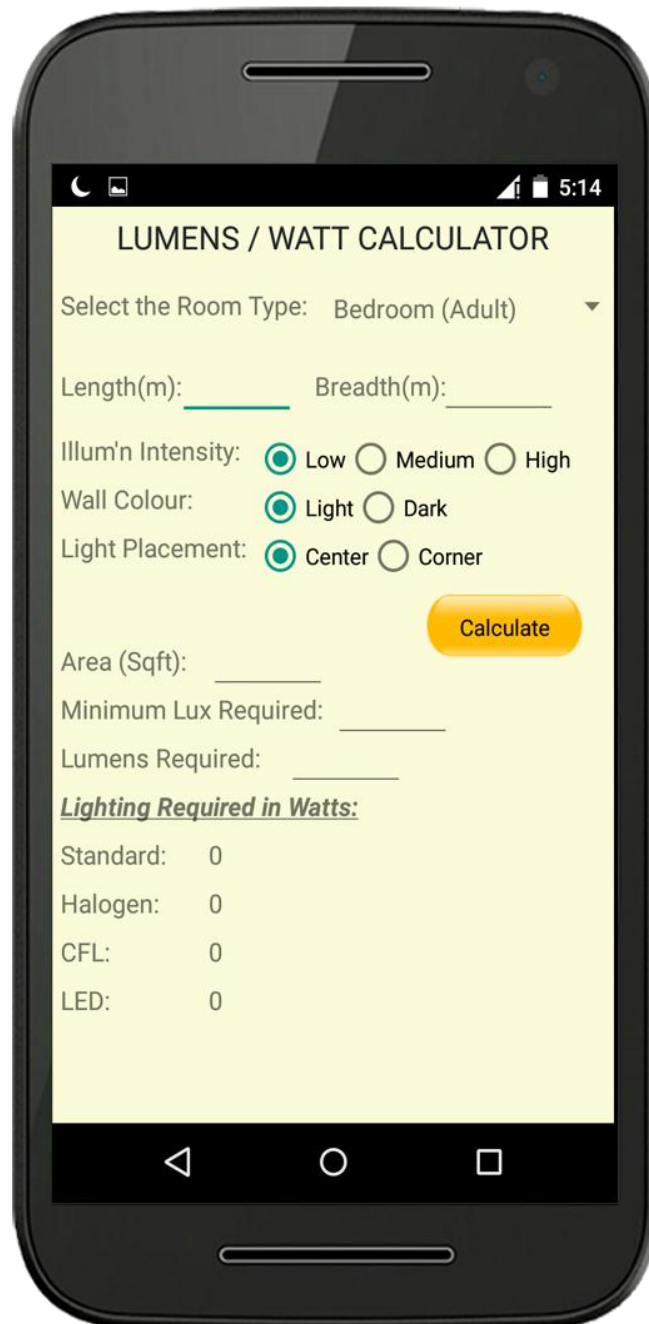

Lumens / Watt Calculator

Lumens / Watt Calculator helps the user to find the number and type of lighting required in a particular room.

The user need to simply select the desired the room from the drop down list as shown below:

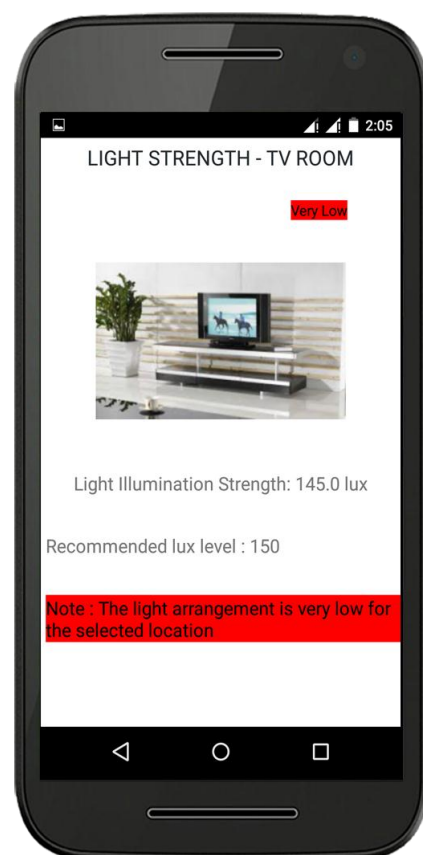

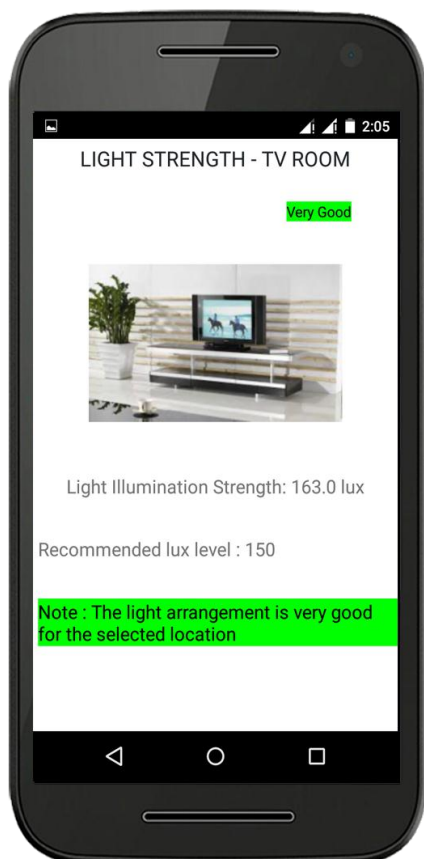

Length & breadth of room to be entered in meter. Further press **Calculate** button to get the results.

1) Light Strength in TV Room

Stand inside the TV Room and place our mobile phone parallel to the earth surface and check whether the Light Level is good for the selected TV Room. If the colour turns green, the presence of Light Level or Light Illumination Strength is **Very Low** for the TV Room. If the colour turns Red, the presence of Light Level or Light Illumination Strength is **Very Good** for the TV Room.

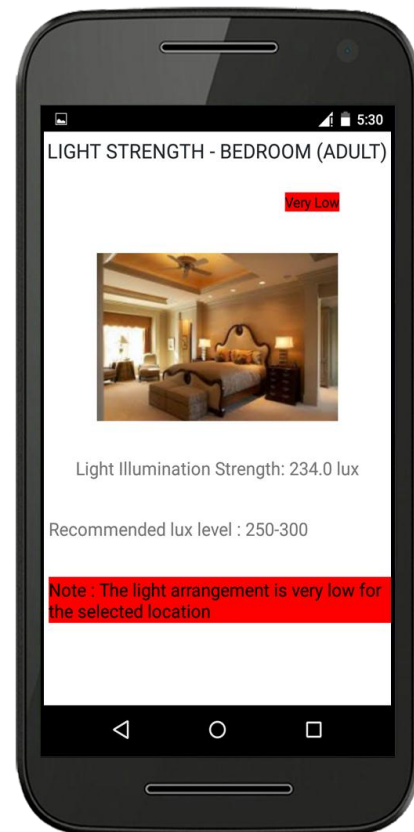

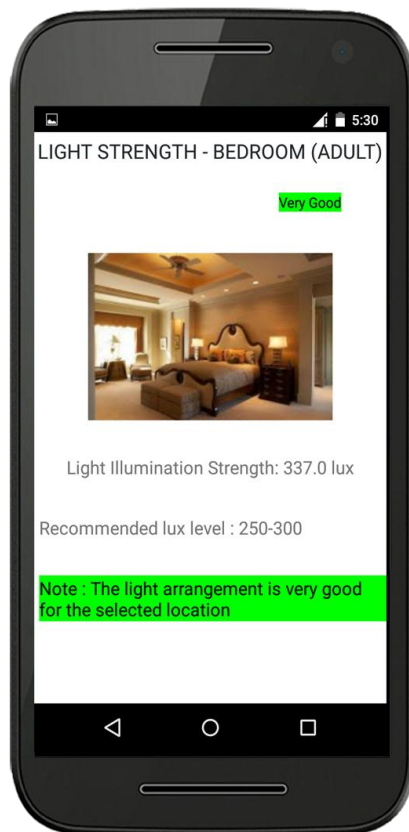

It is suggested to make necessary arrangements for proper Lighting via Sunlight (Enough Doors/Windows to be installed) or Lighting as recommended for each location. *The Lighting should be placed at middle of the room to get better results.*

2) Light Strength in Bedroom (Adult)

Stand inside the Bedroom (Adult) and place our mobile phone parallel to the earth surface and check whether the Light Level is good for the selected Bedroom (Adult). If the colour turns green, the presence of Light Level or Light Illumination Strength is **Very Low** for the Bedroom (Adult). If the colour turns Red, the presence of Light Level or Light Illumination Strength is **Very Good** for the Bedroom (Adult).

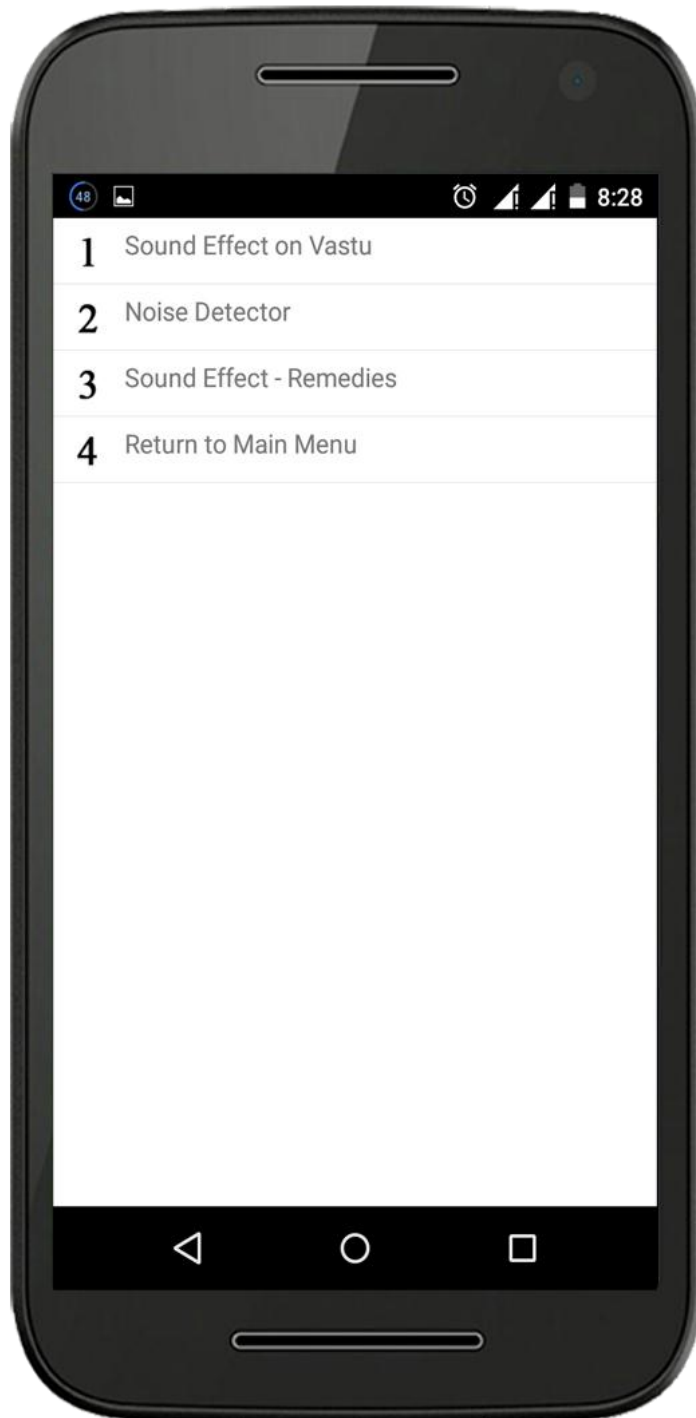

It is suggested to make necessary arrangements for proper Lighting via Sunlight (Enough Doors/Windows to be installed) or Lighting as recommended for each location. *The Lighting should be placed at middle of the room to get better results.*

13) NOISE DETECTOR & REMEDIES

Noise Detector & Remedies Menu

Noise Detector & Remedies menu helps to view the Sound Effect on Home Vastu

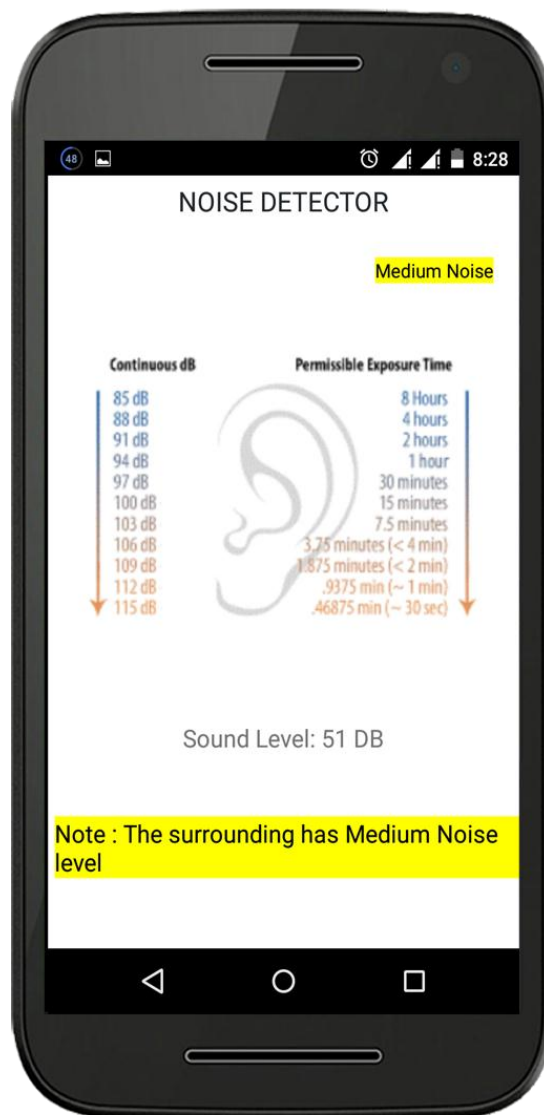

Screen – Sound Effect on Home Vastu

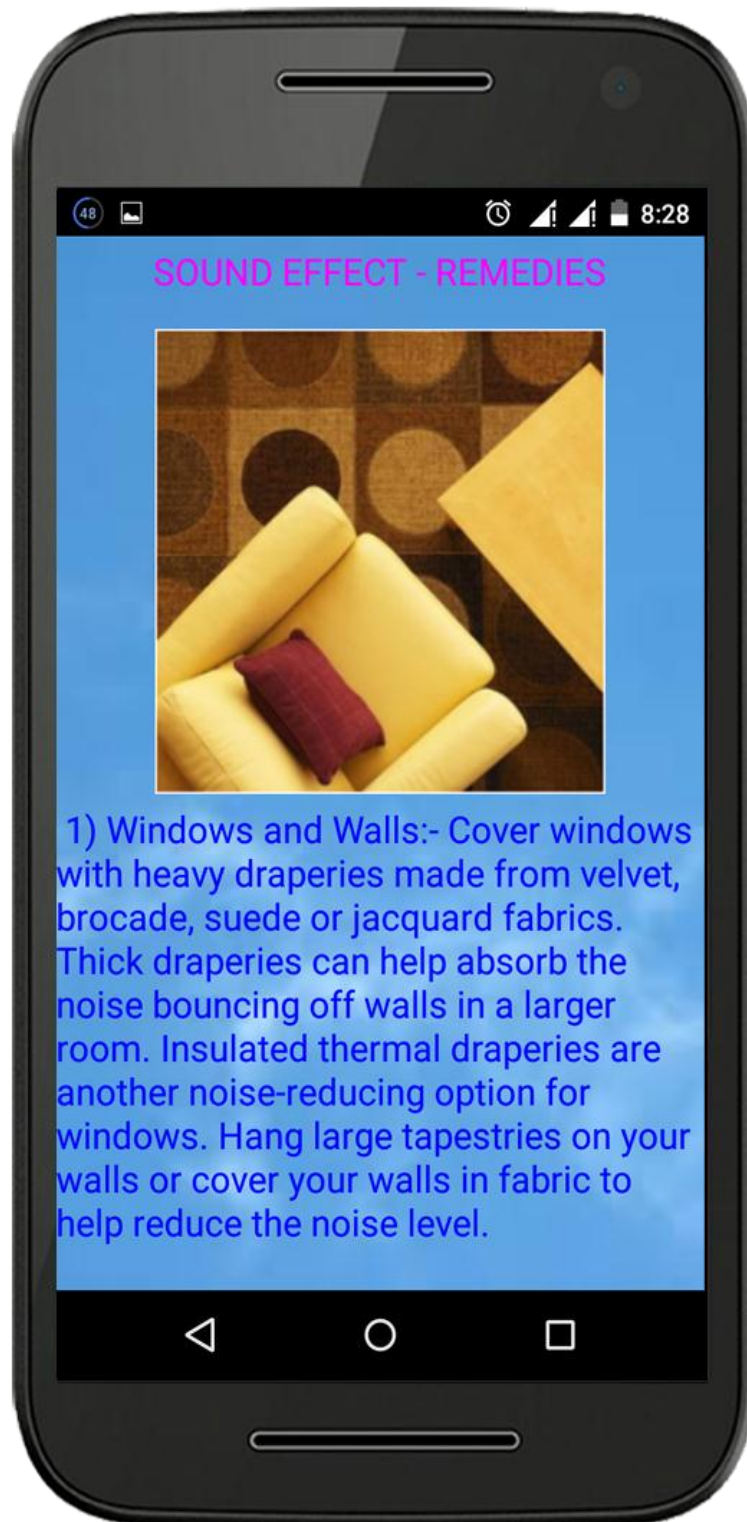

Noise Detector

Hold your mobile phone parallel to the earth surface. *If the colour turns green, the surrounding has **Low Noise**. If the colour turns yellow, the surrounding has **Medium Noise**. If colour of arrow turns red then the surrounding has **High Noise** and that to be corrected immediately.*

Sound Effect Remedies

14) WEATHER FORECASTING

Weather Forecasting Menu

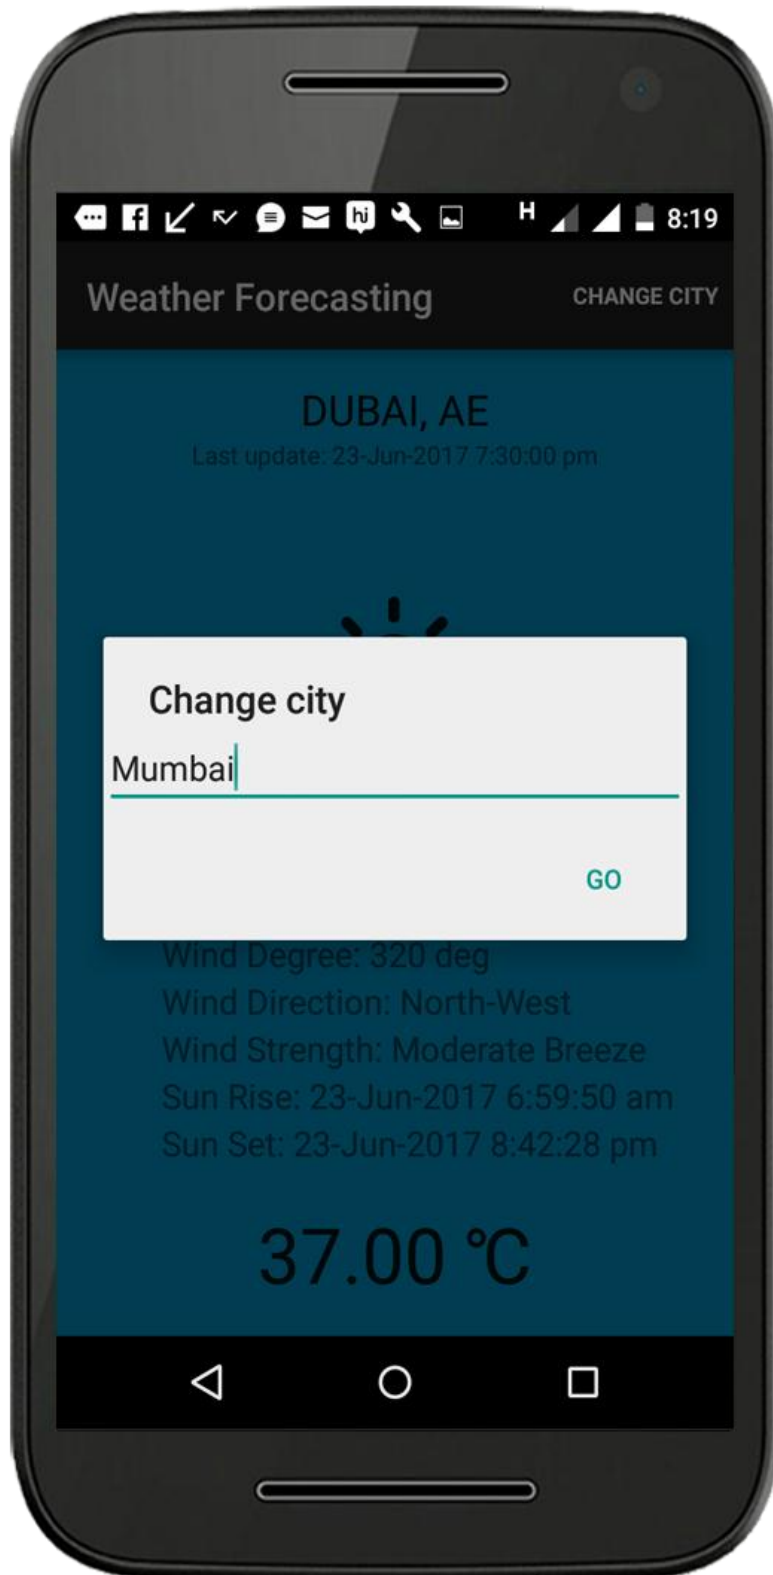

Weather Forecasting menu helps to view the Weather Forecasting Application.

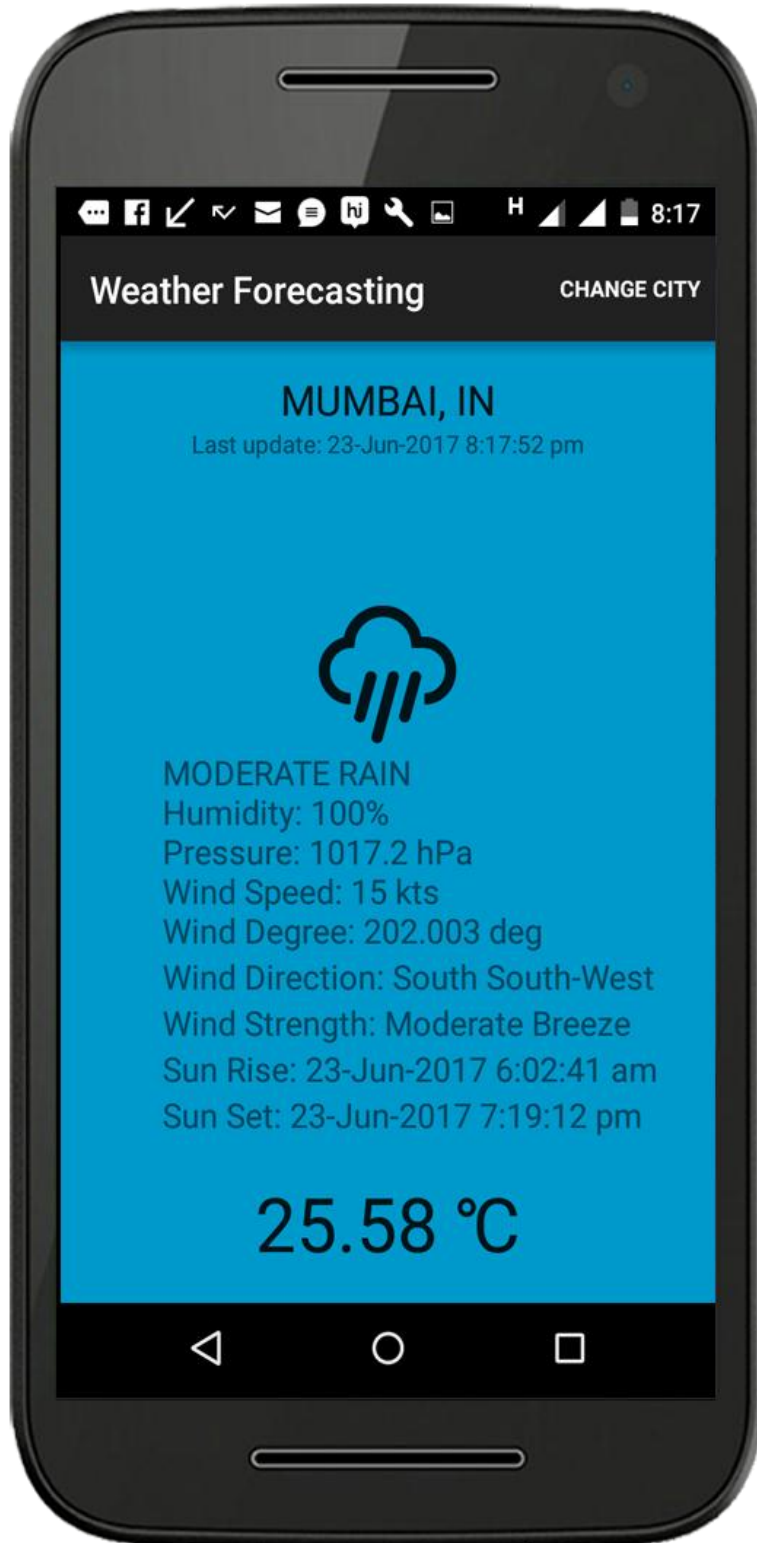

Weather Forecasting Application

Select **“Change City”** option to get the weather details of a desired city.

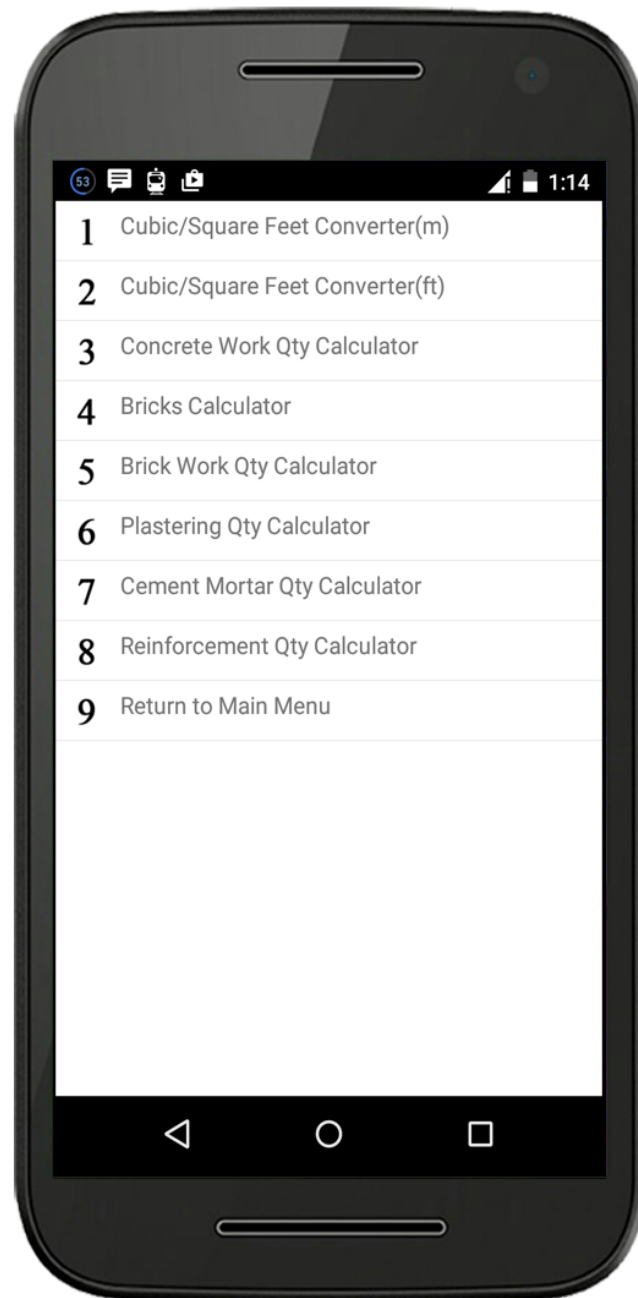

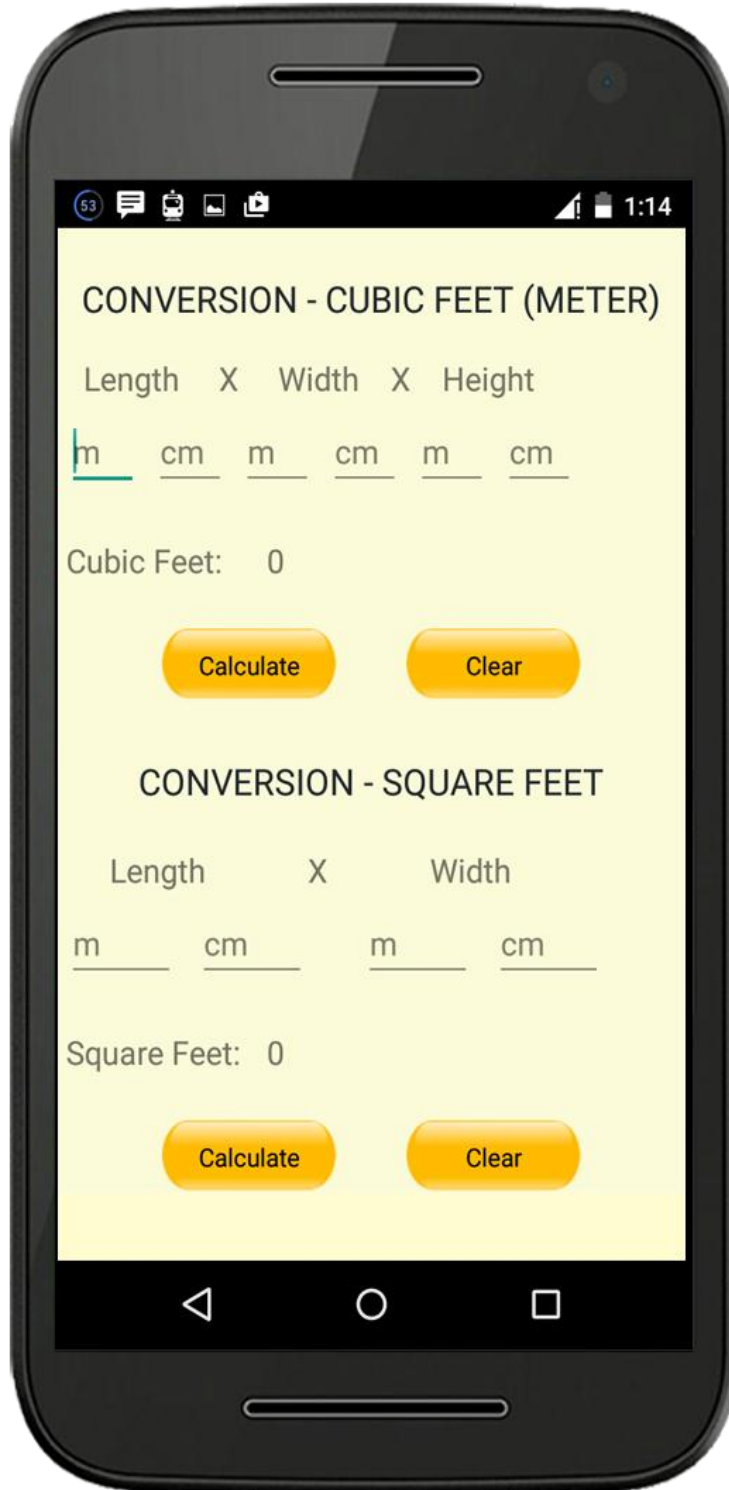

15) CIVIL ENGINEERING CALCULATION

Civil Engineering Calculation Menu

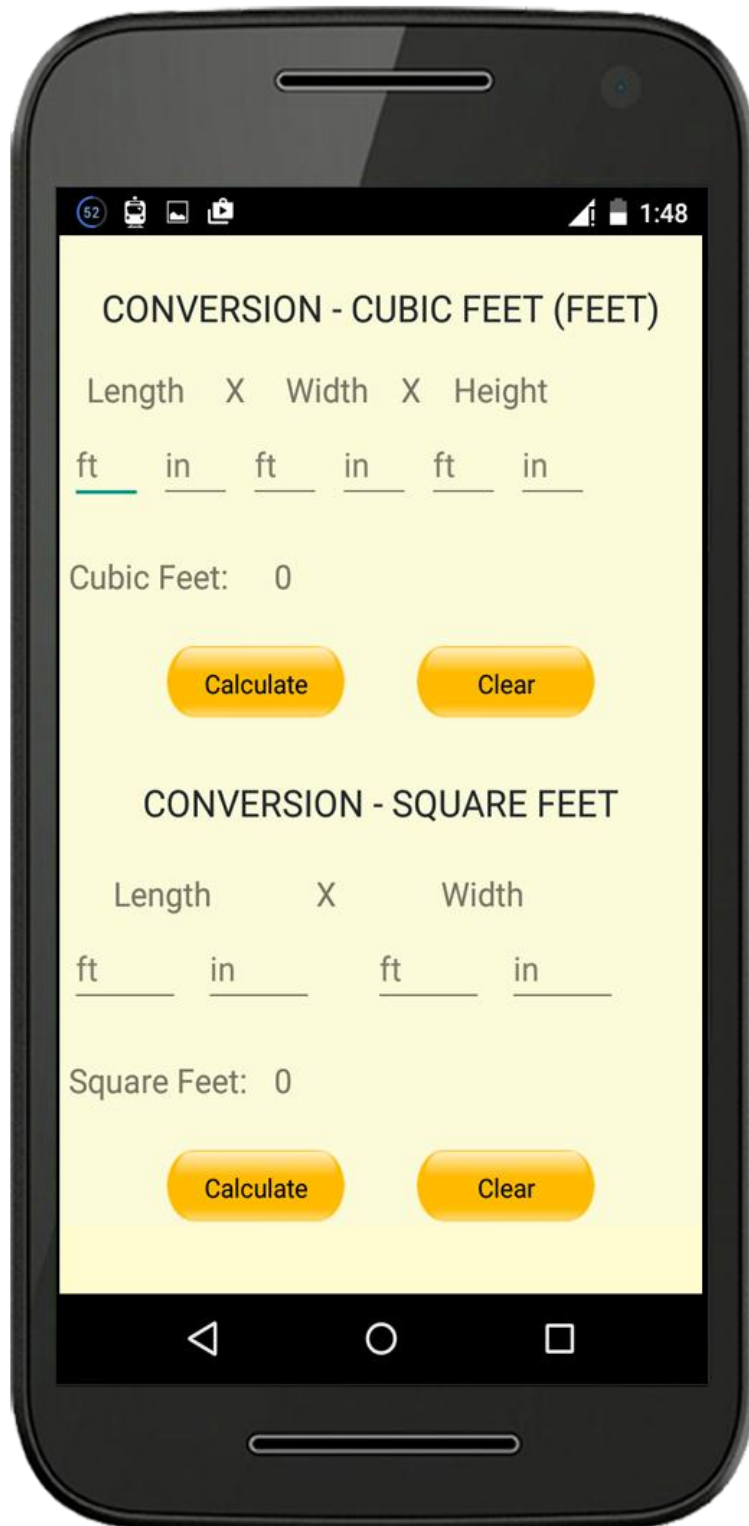

Civil Engineering calculation menu helps to view the Civil Engineering Calculations.

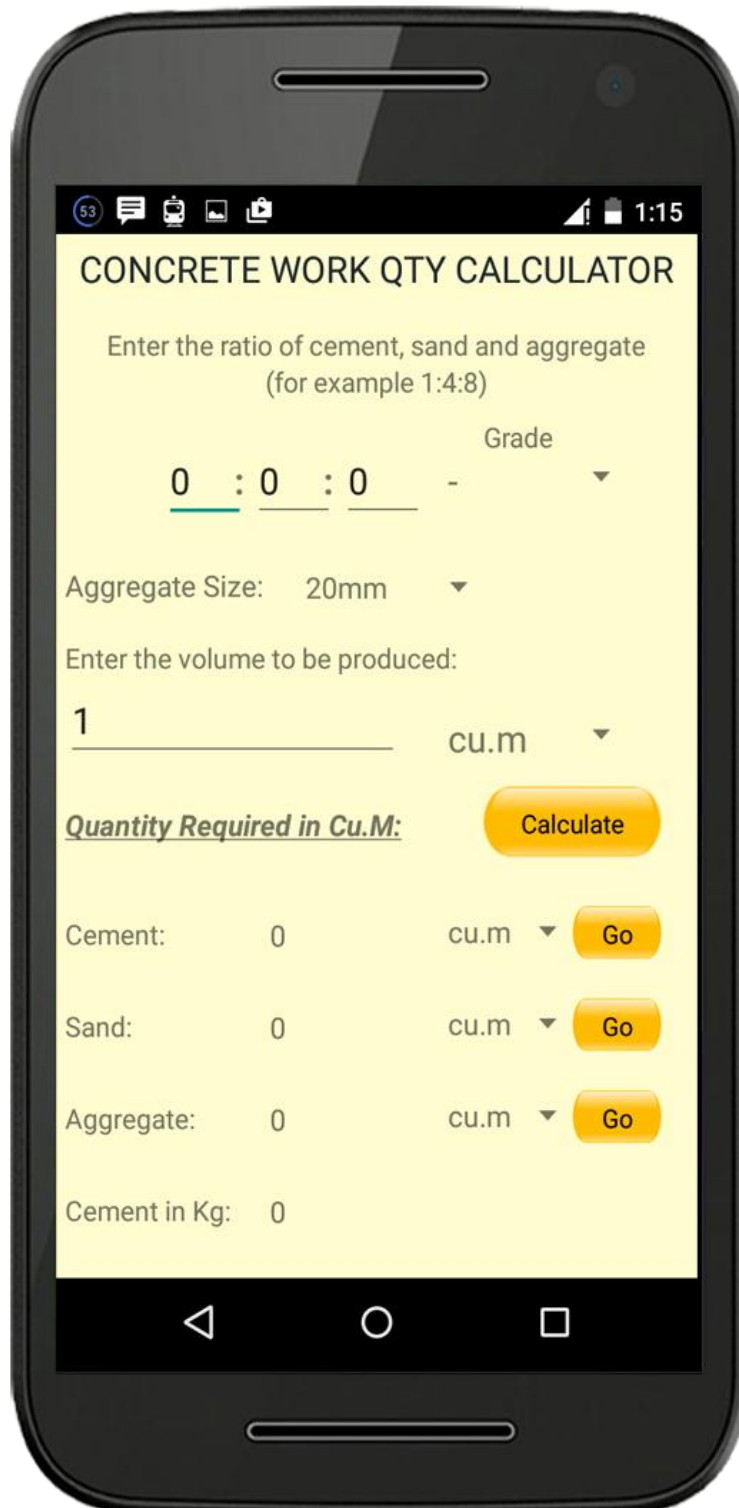

1) Conversion – Cubic/Square Feet (Meter)

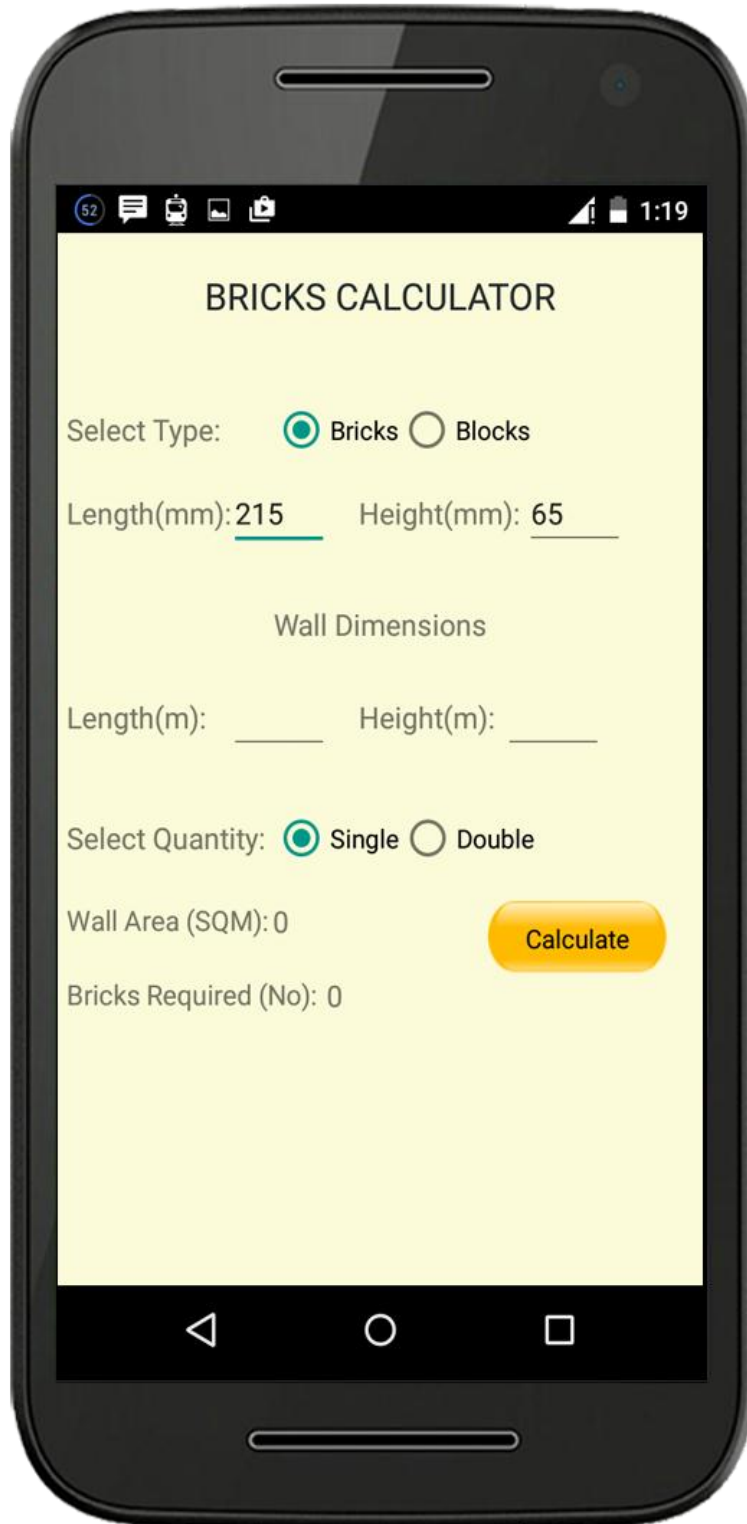

2) Conversion – Cubic/Square Feet (Feet)

3) Concrete Work Quantity Calculator

4) Bricks Calculator

5) Bricks Work Quantity Calculator

BRICKS WORK QTY CALCULATOR

Enter the ratio of cement and sand
(for example 1:4)

1 : 1

Enter the volume to be produced:

1 cu.m

Quantity Required in Cu.M: Calculate

Bricks in No: 0

Cement: 0 cu.m Go

Sand: 0 cu.m Go

Cement in Kg: 0

6) Plastering Work Quantity Calculator

53 1:15

PLASTERING WORK QTY CALCULATOR

Enter the ratio of cement and sand
(for example 1:4)

1 : 1

Enter the Surface Area: 1 sq.m

Enter the Thickness: 12 mm

Select the unit for calculation: cu.m

Quantity Required in Cu.M:

Cement: 0 cu.m

Sand: 0 cu.m

Cement in Kg: 0

Cement in bag (Portland): 0

7) Cement Mortar Quantity Calculator

CEMENT MORTAR QTY CALCULATOR

Enter the ratio of cement and sand
(for example 1:4)

1 : 1

Enter the volume to be produced:

1 cu.m

Quantity Required in Cu.M: Calculate

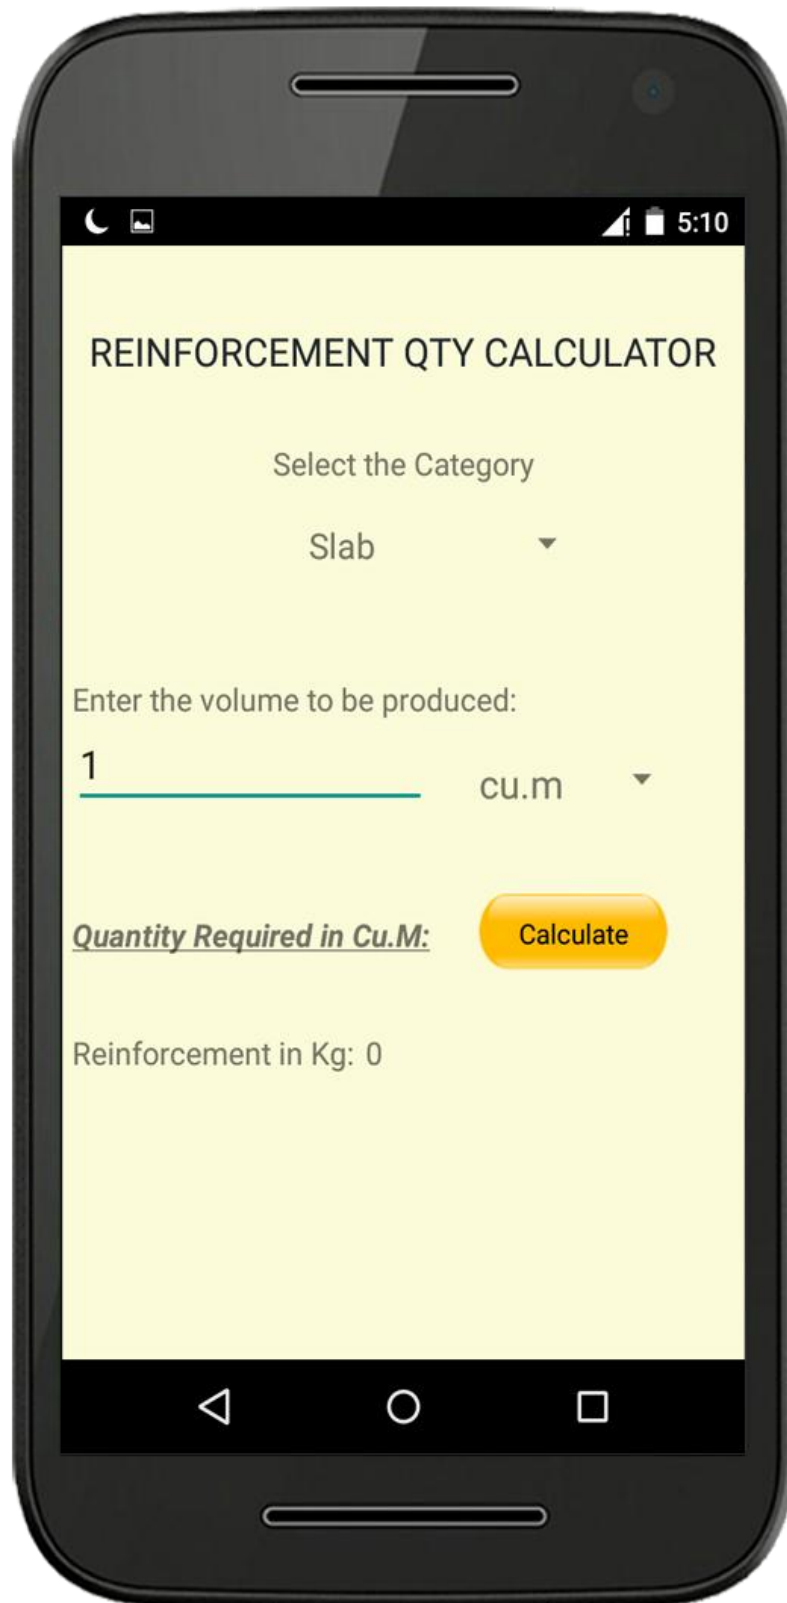

Cement: 0 cu.m Go

Sand: 0 cu.m Go

Cement in Kg: 0

Cement in bag (Portland): 0

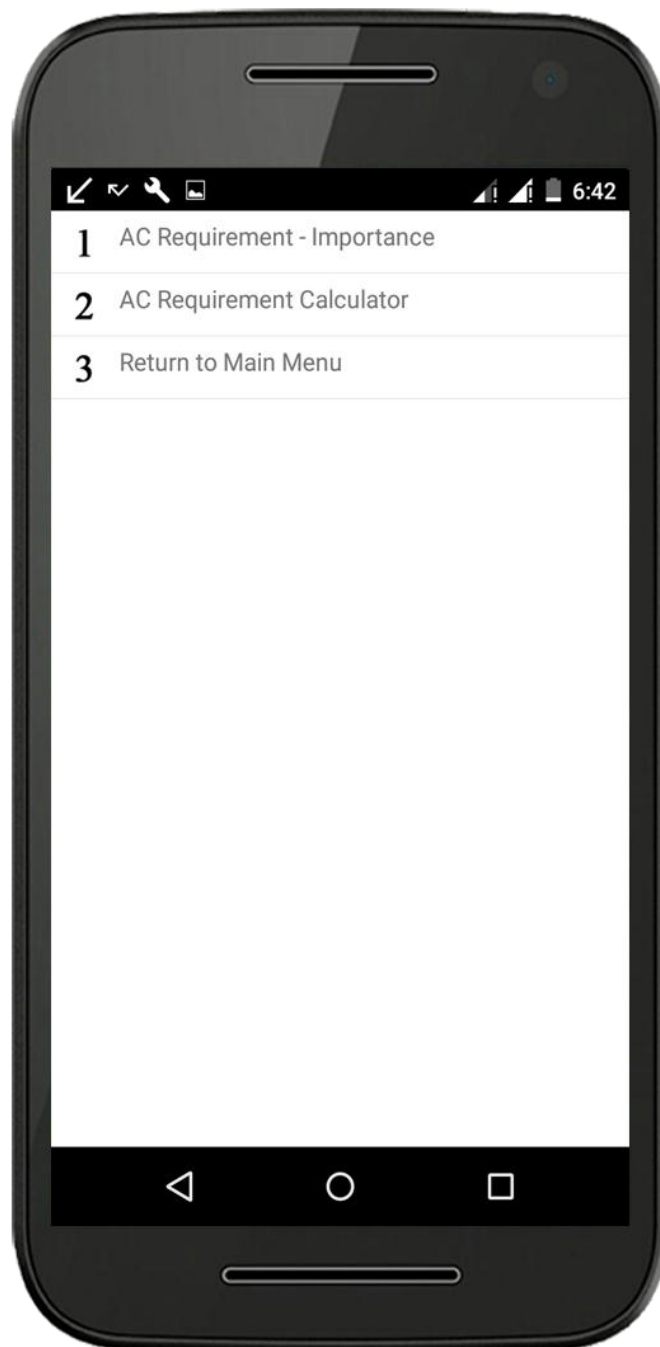

8) Reinforcement Quantity Calculator

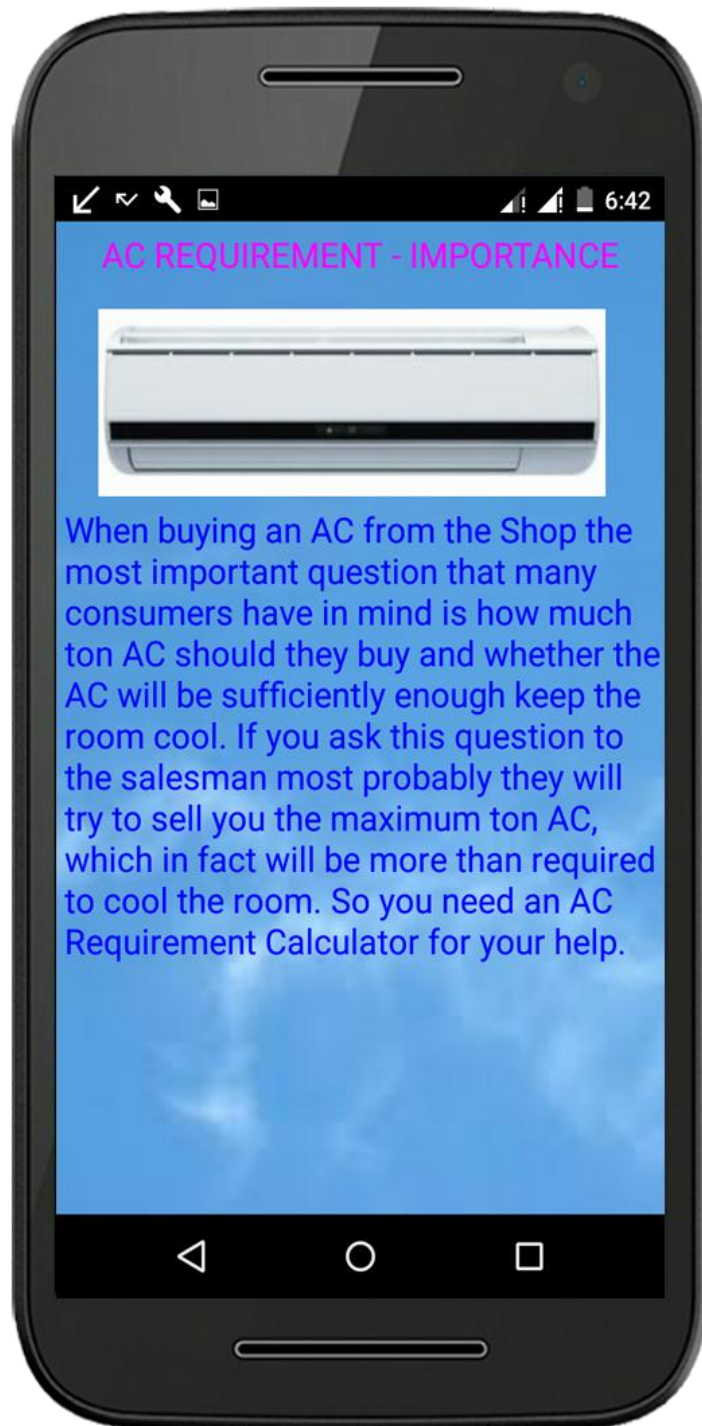

16) AC REQUIREMENT CALCULATION

AC Requirement Calculation Menu

AC Requirement calculation menu helps to view the AC Requirement calculation & its importance.

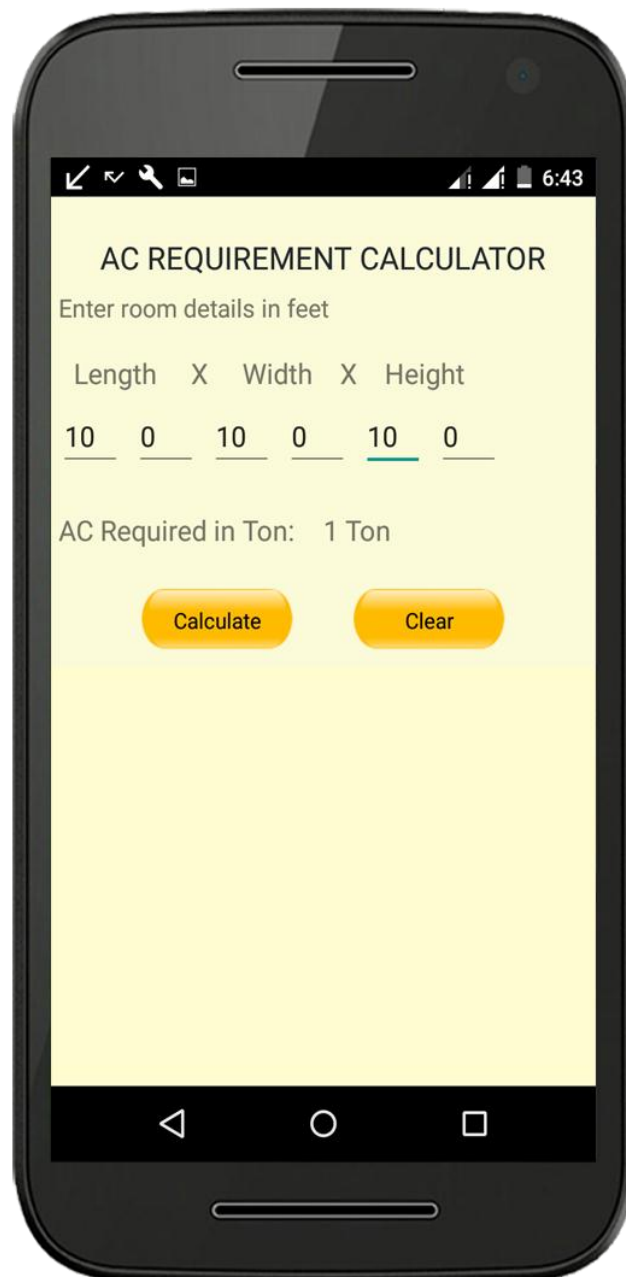

AC Requirement Importance

AC Requirement Calculator

Enter the Length, Width & Height details of a Room to get the AC requirement (Ton) of that particular room.

Ayadi Calculation Menu

Ayadi calculation menu helps to view the Building Formulae in 6 Languages with Ayadi calculation rules.

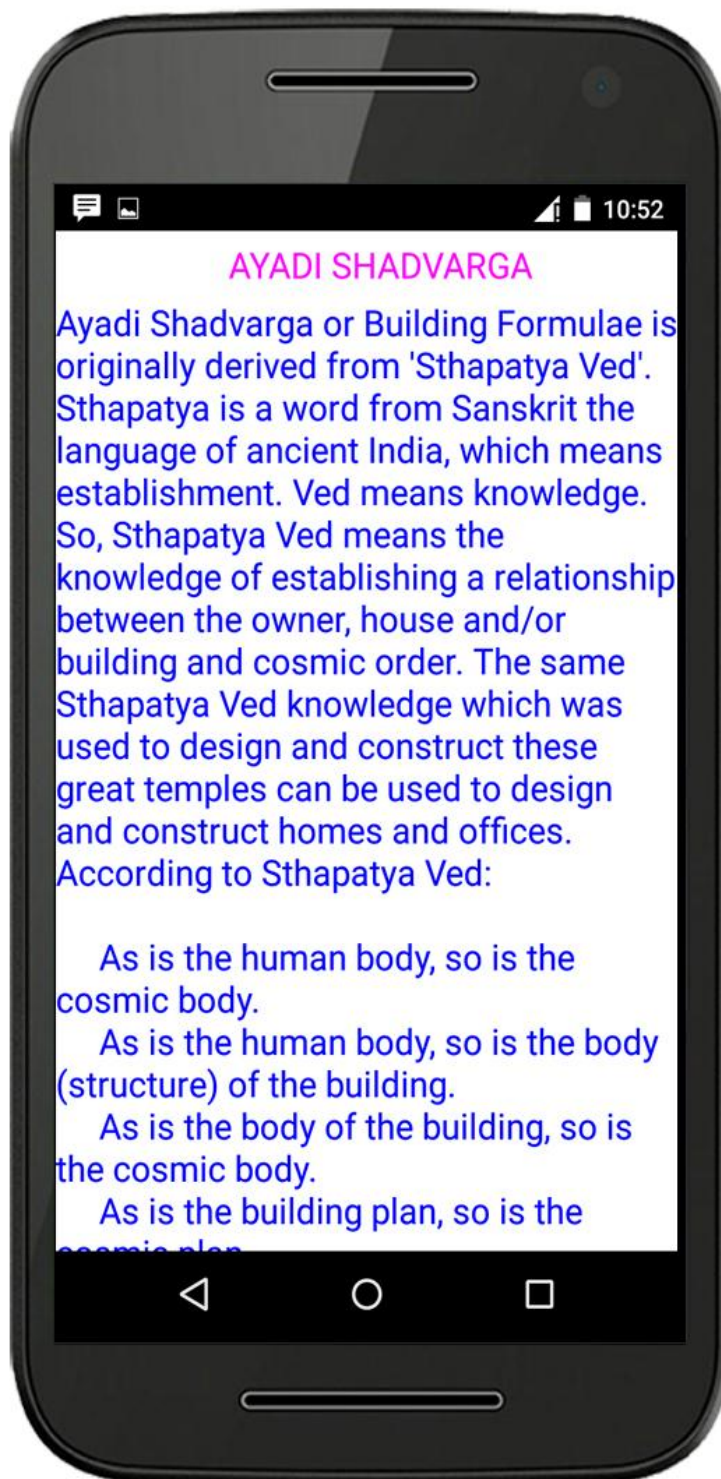

Ayadi Calculation Rules – Menu

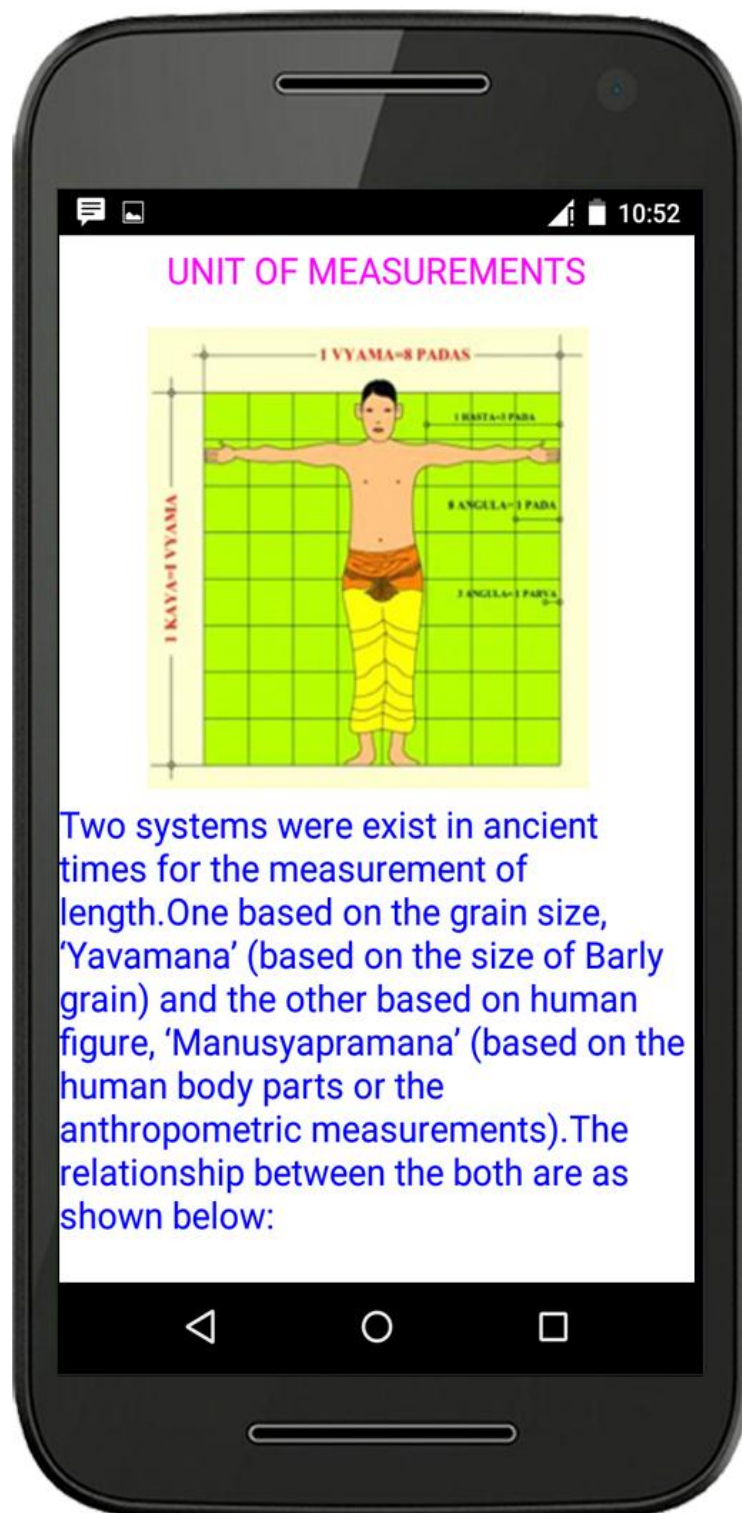

Ayadi calculation rules menu helps to view and know the detailed Ayadi calculation rules and its concept even it can be understood by a **beginner** in Vastu.

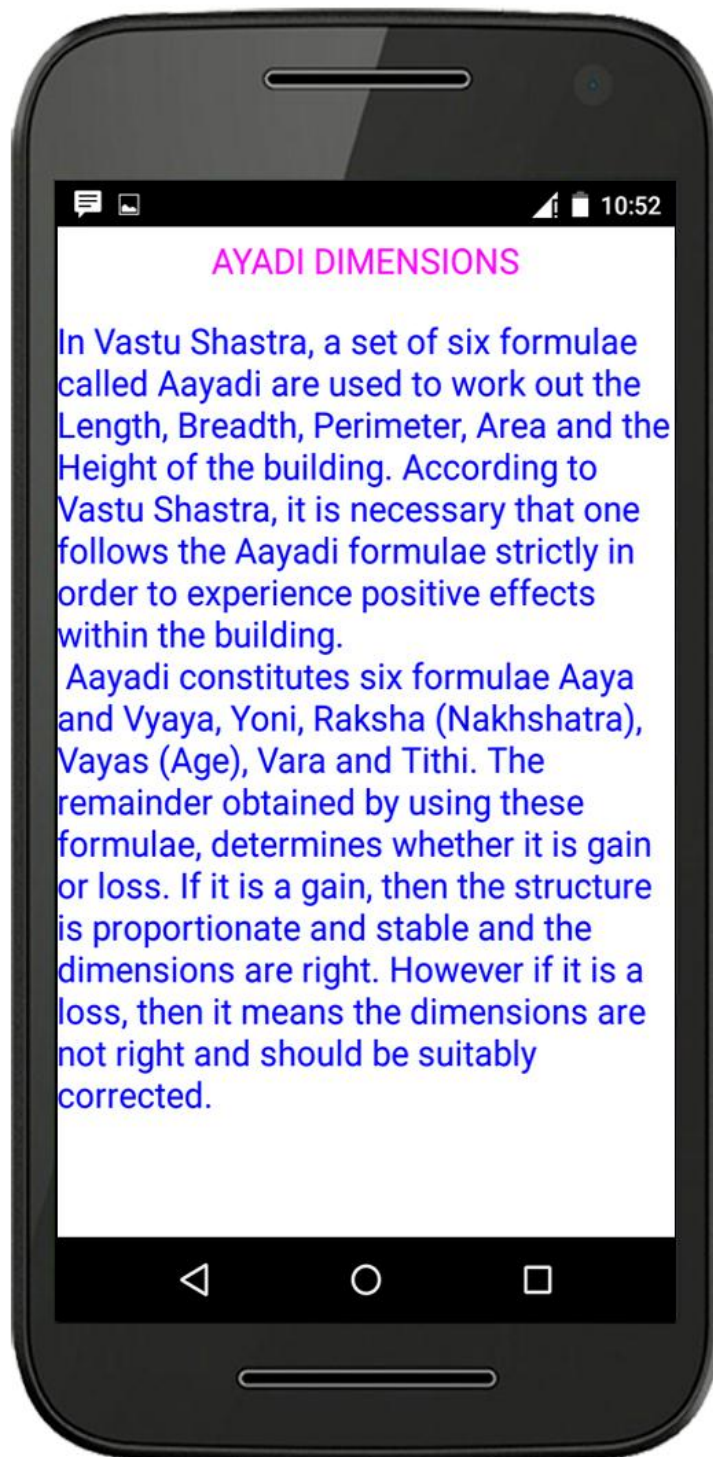

a) Ayadi Description

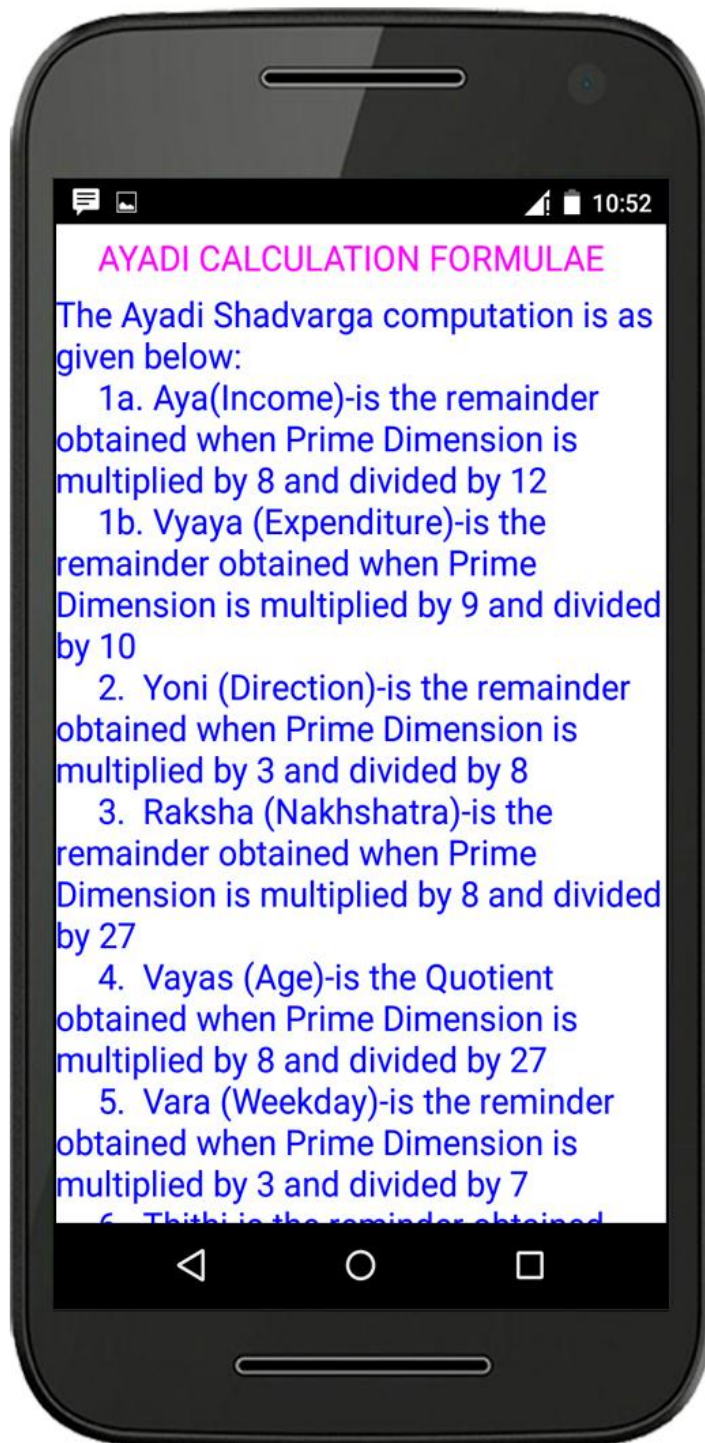

b) Unit Of Measurement

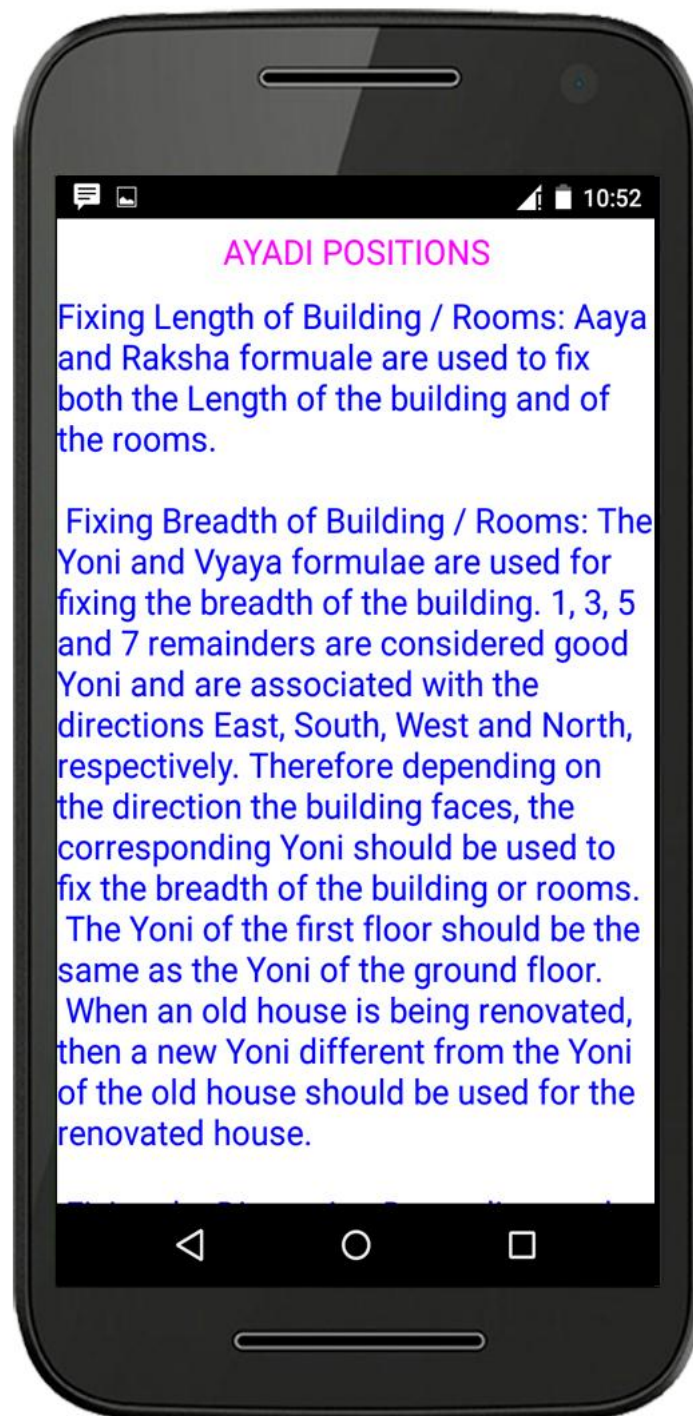

c) Ayadi Dimensions

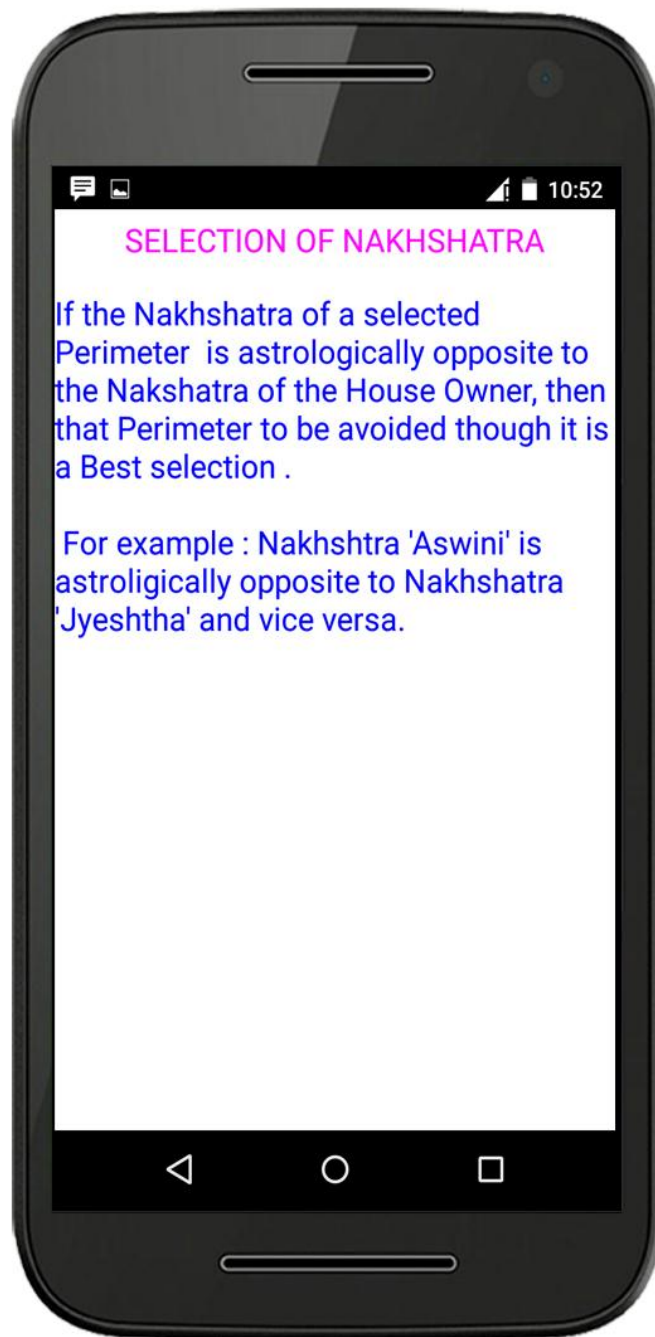

d) Ayadi Calculation Formulae

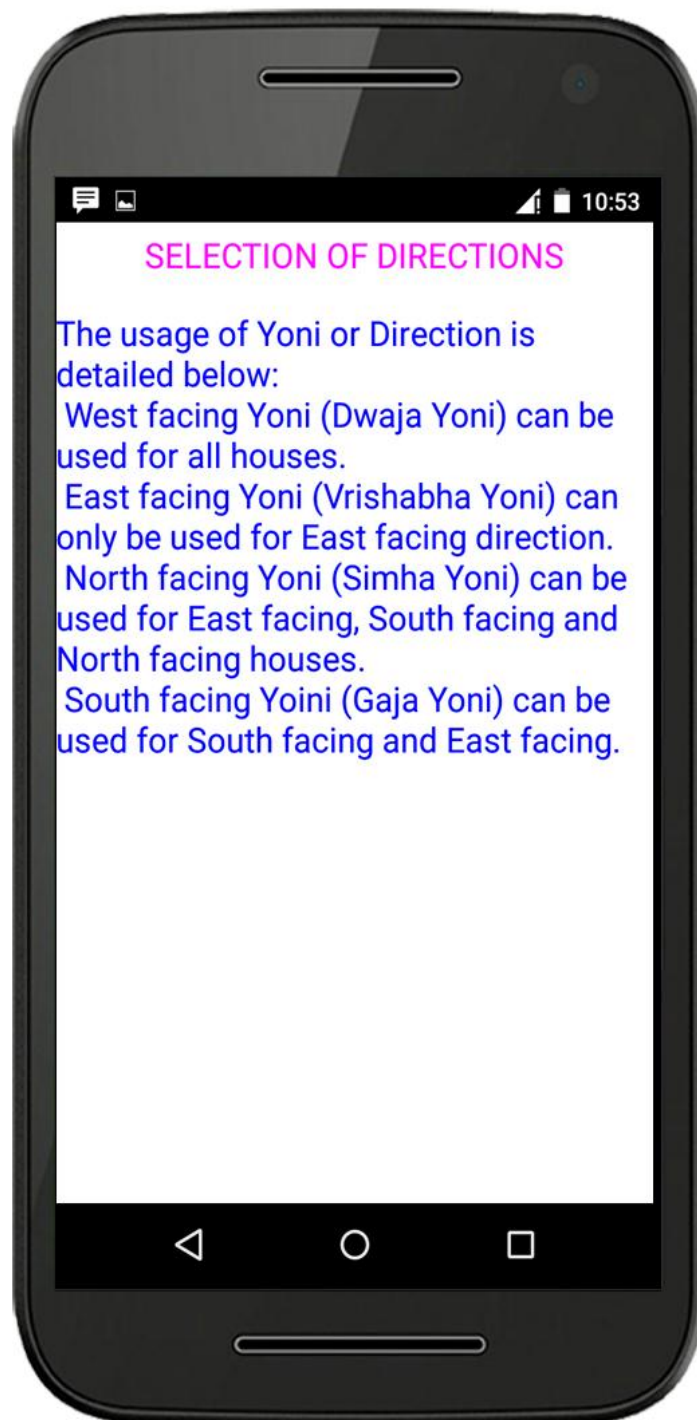

e) Ayadi Positions

f) Selection of Nakshatra

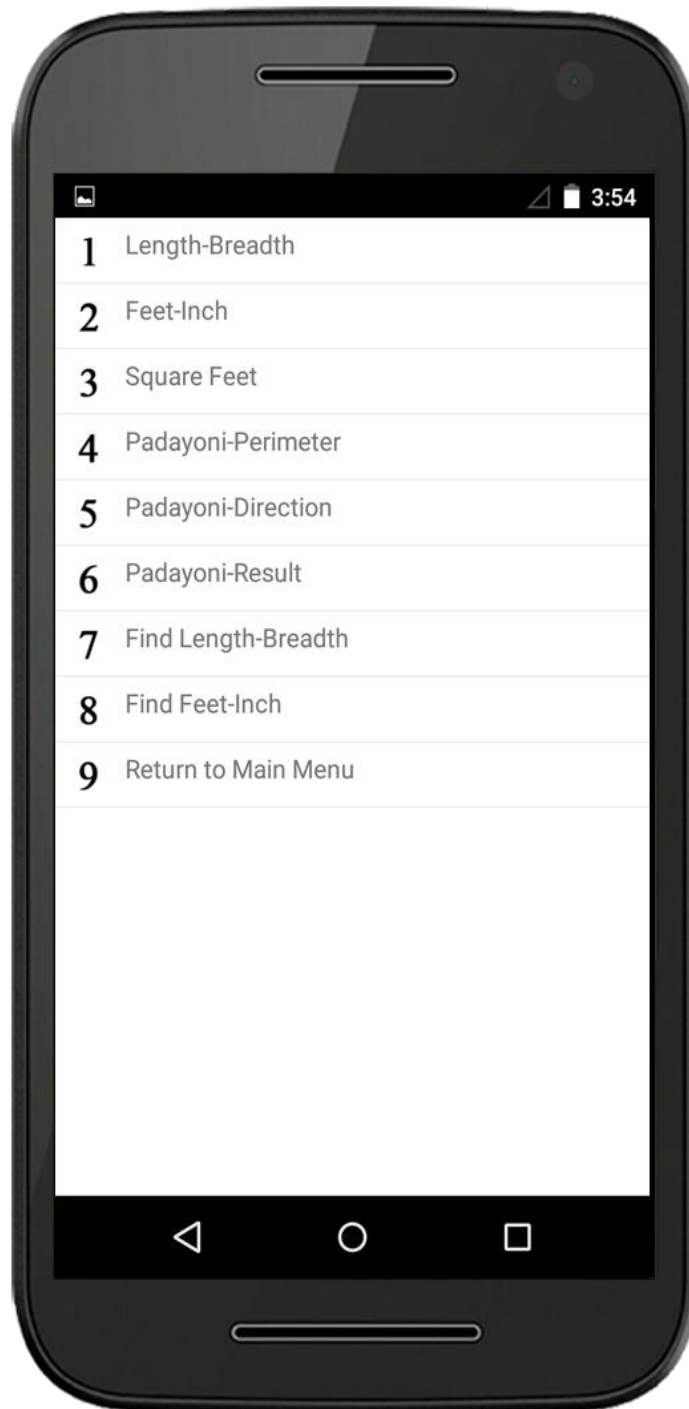

g) Selection of Directions

Ayadi Calculation Selection – Menu

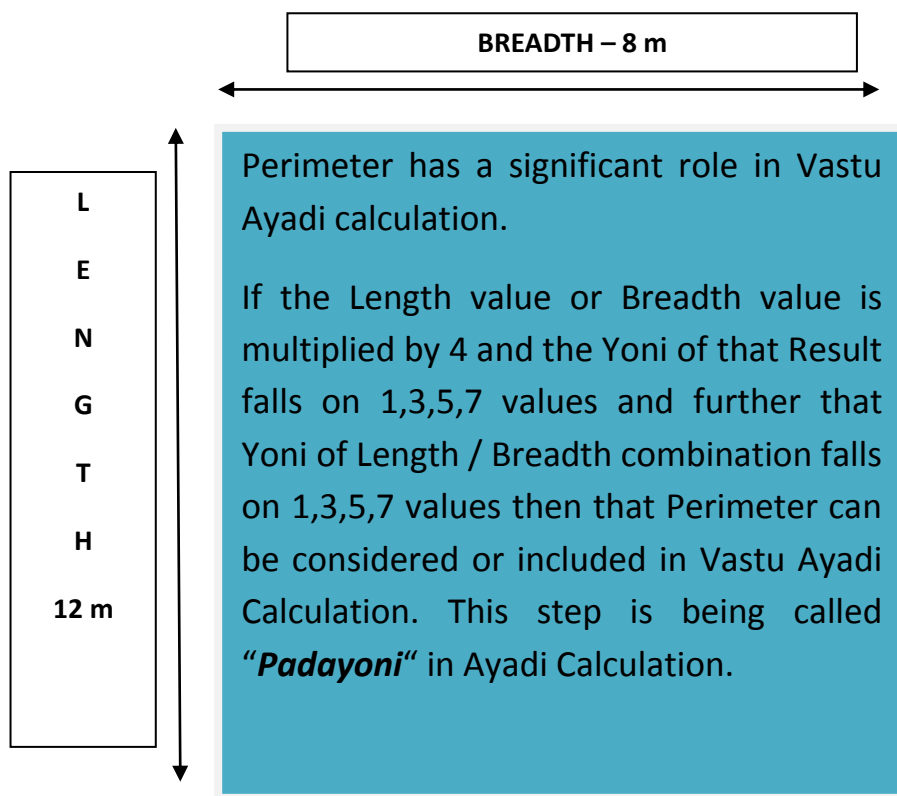

Ayadi calculation selection menu helps to view and access all the programmes as shown below

Ayadi Calculation – Length & Breadth in Meter

Suppose you have visited a house and that house having some Vastu related problems. As per Vastu, the Perimeter of a house/room should be ‘**Best**’ considering all factors related with Ayadi calculation such as Vyaya, Aya, Nakhshathra, Age, Karana, Thithi and Weekday etc. So here with the help Vastu Soft Application you can know the Vastu Status of an existing house or a new house. The outer wall Perimeter to be considered while you are selecting a house and the inside Perimeter to be considered while you is selecting a room.

Perimeter Working Concept

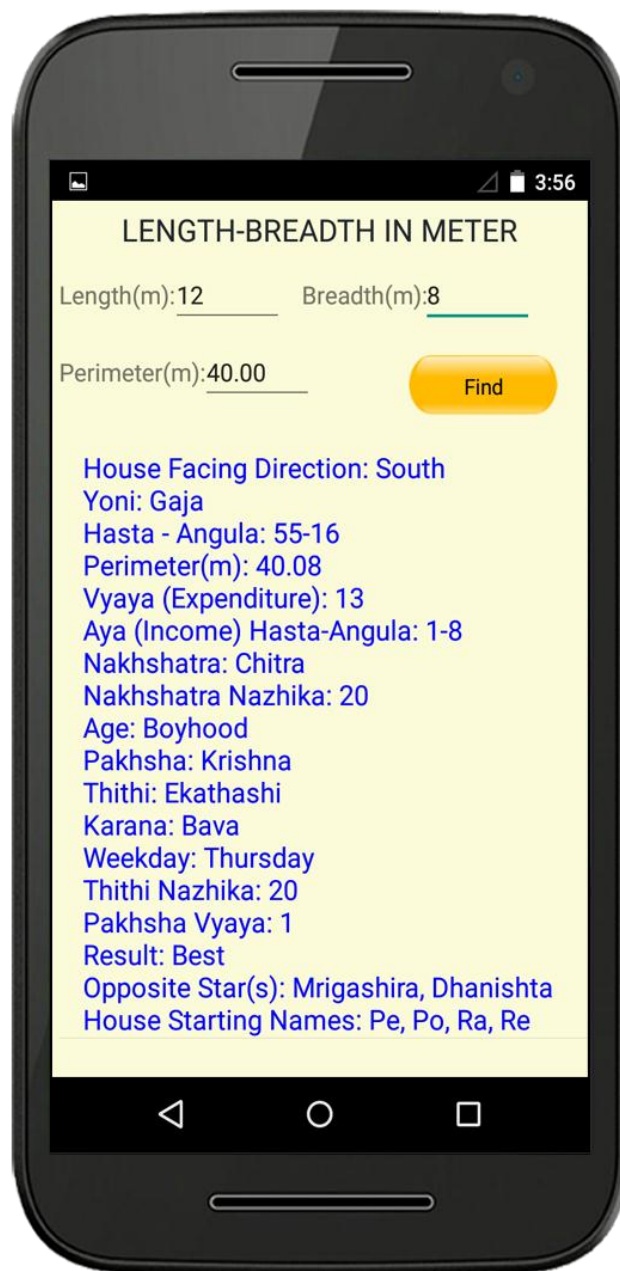

Working with Vastu Soft Application

Press **Find** Button after entering the value (in meter) in Length & Breadth fields respectively. For example Length - 12 m & Breadth – 8 m respectively. The nearest result will be shown in all 6 languages as detailed below.

We can check the existing measurement of a house till 35,508 sqft i.e. equivalent to Perimeter 230 m & Hasta-Angula 320-8.

Also by using our Vastu Soft Application we can build a house (Ground Floor) maximum of 5,048 sqft i.e. equivalent to Perimeter 86.64 m & Hasta-Angula 120-8.

13. Purchase Dept.
14. Marketing Dept.
15. R&D Dept.
16. Show Case
17. Basement
18. Stair Case
19. Open Space
20. Heavy Items
21. Water Tank

Working with Vastu Soft Application

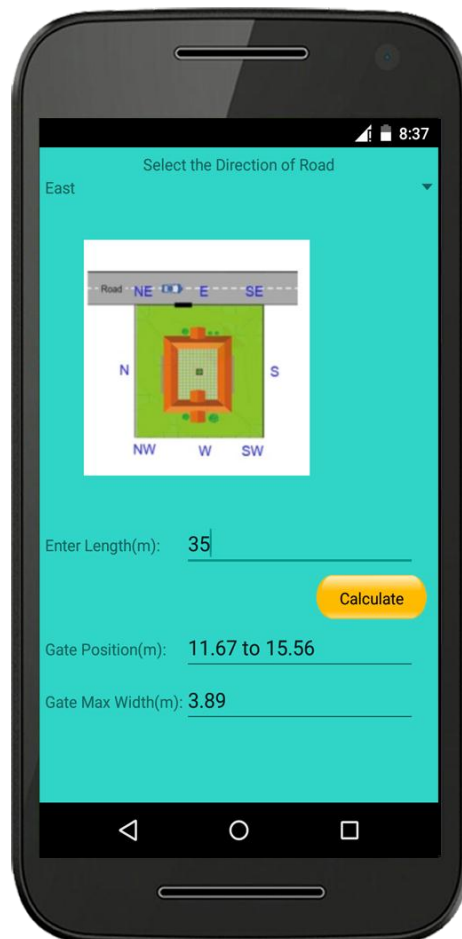

Place our mobile phone parallel to the earth surface and hold it same as a compass. Point our phone to desired direction where you want to know whether the pointed direction is favourable or unfavourable. The location where the colour shows as **GREEN** is favourable as per Vastu. The location where the colour shows as **RED** is unfavourable as per Vastu. **Stand away from any Magnetic / Metallic substances for best results.**

For Example the Vastu Compass of Prayer Room in an Office is as shown below.

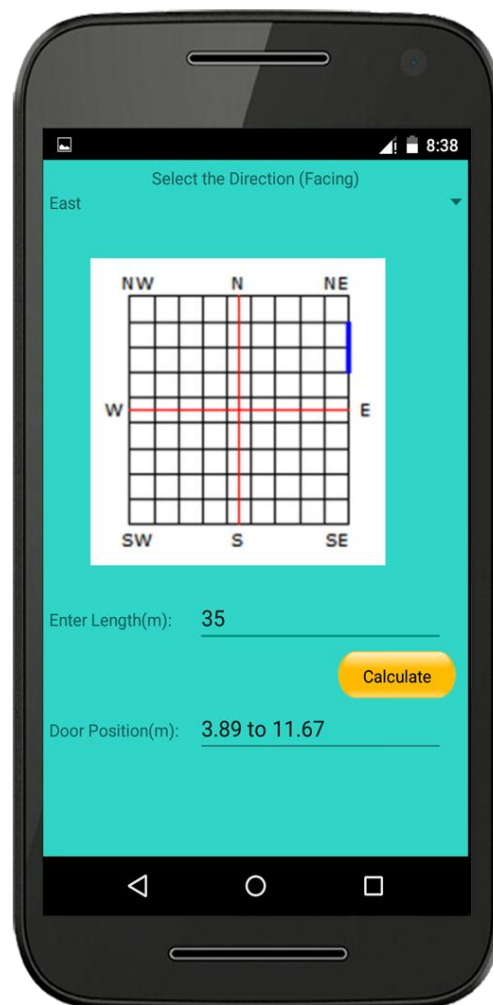

28) MAIN GATE CALCULATOR

Select the Direction of Road from the Drop down menu. Enter the length (m) of the land where we want to make a MAIN GATE as per Vastu. Press **Calculate** button to get the details of Gate Position (m) & Gate Max Width (m). Note: The Zero starts from where the Gate shows in 4th Padha of the Land (Total Padha - 9). For example here we selected the Road Direction as East. So the zero point starts from NE to SE.

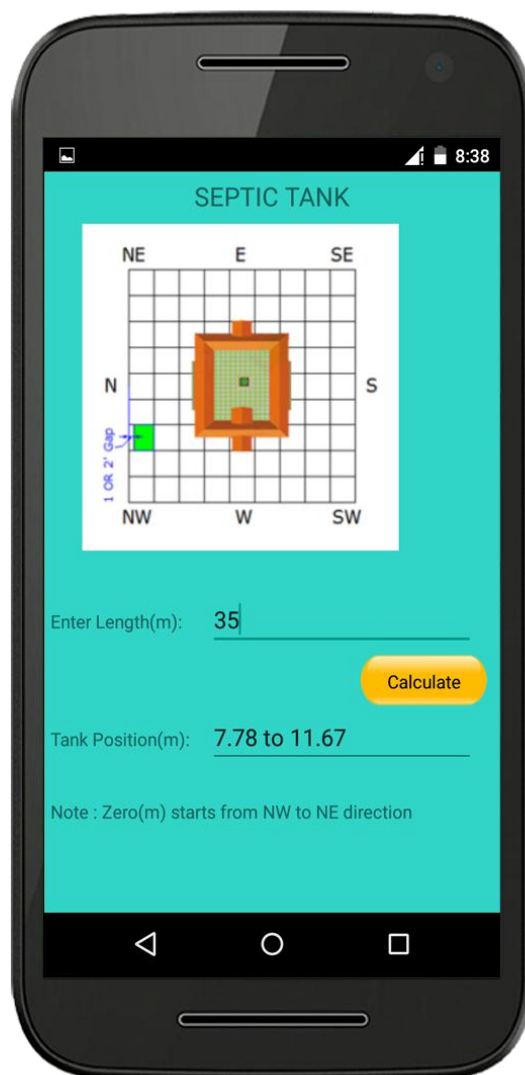

29) MAIN DOOR CALCULATOR

Select the House Facing Direction from the Drop down menu. Enter the length (m) of the land where we want to install a MAIN DOOR as per Vastu. Press **Calculate** button to get the position of Main Door (m).

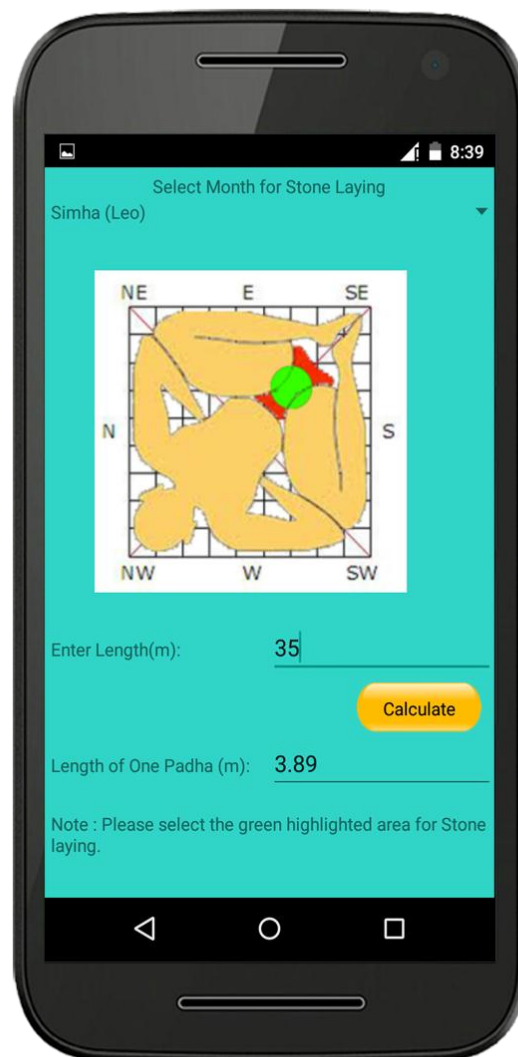

30) SEPTIC TANK CALCULATOR

Enter the length (m) of the land where we want to erect a SEPTIC TANK as per Vastu. Press **Calculate** button to get the position of Septic Tank (m).

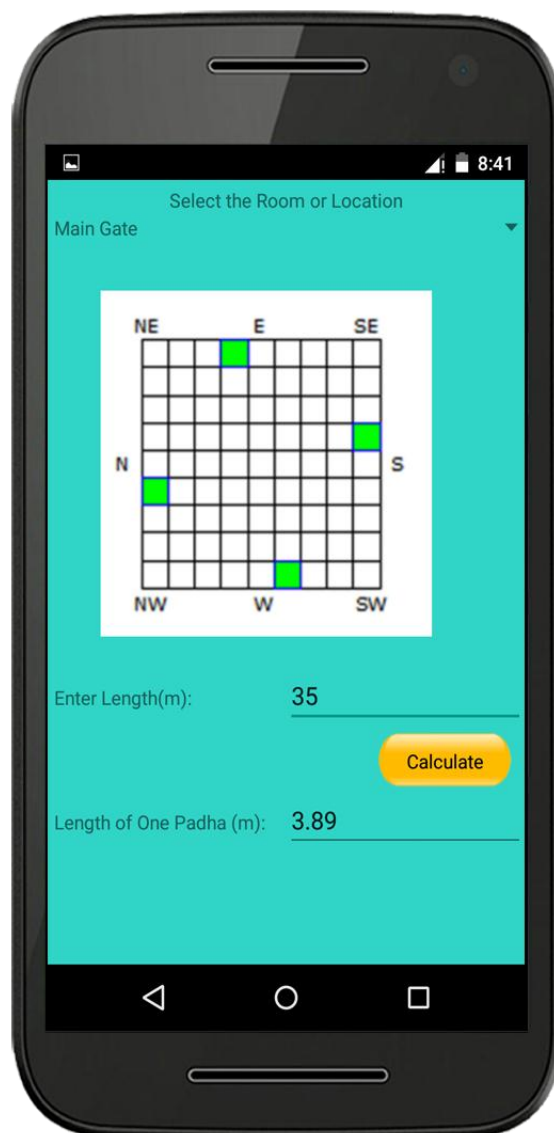

31) STONE LAYING POSITIONS

Select the Month for Stone laying from the Drop down menu. Enter the length (m) of the land where we want to know the Length of one Padha as per Vastu. Press **Calculate** button to get the result.

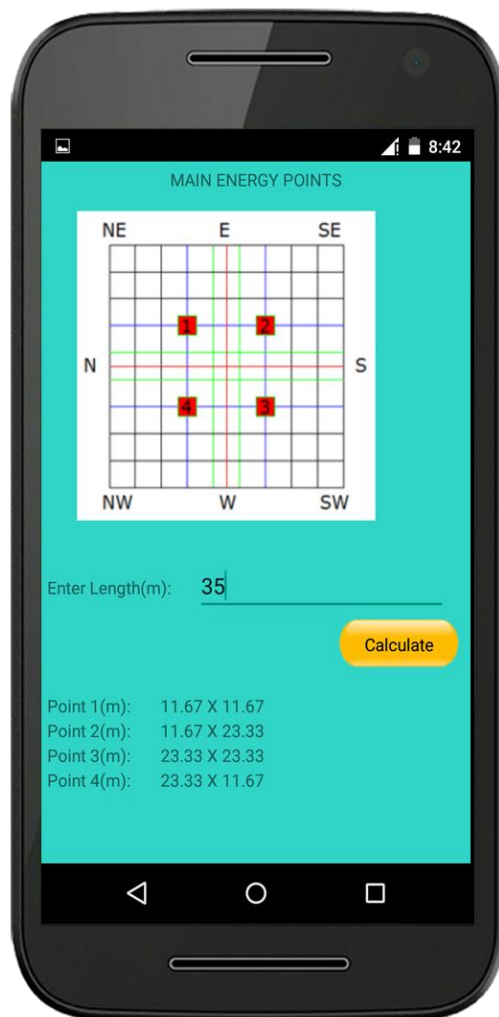

32) ENERGY POSITIONS

Select the Room/Location from the Drop down menu. Enter the length (m) of the land where we want to know the Length of one Padha as per Vastu. Press **Calculate** button to get the result.

33) MAIN ENERGY POINTS

Enter the length (m) of the land where we want to know the four main Energy Points that to be avoided during construction of a building.

34) EXIT

Press Exit Menu to Exit from the Application

END
